## NSX SILVER INC.

### MANAGEMENT'S DISCUSSION AND ANALYSIS FOR THE QUARTER ENDED JUNE 30, 2012

#### **Background**

This Management's Discussion and Analysis (MD&A) of NSX Silver Inc. (NSX Silver or the Company) is dated August 27, 2012 and provides an analysis of the financial operating results for the quarter ended June 30, 2012. This MD&A should be read in conjunction with the unaudited financial statements and accompanying notes for the quarter ended June 30, 2012 which have been prepared in accordance with International Financial Reporting Standards (IFRS) for financial statements. This MD&A should also be read in conjunction with the audited annual financial statements and accompanying notes for the year ended December 31, 2011. All amounts are in Canadian dollars unless otherwise specified. The financial statements and additional information, including news releases and technical reports referenced herein, are available on the Canadian System for Electronic Document Analysis and Retrieval (SEDAR) at [www.sedar.com](http://www.sedar.com) under the Company's profile. The common share of NSX Silver are traded on the TSX Venture Exchange under the symbol "NSY". More extensive information on NSX Silver can be found on its website at [www.nxsilver.com](http://www.nxsilver.com).

#### **Forward-Looking Information**

Certain statements in this MD&A are forward-looking statements or information (collectively- forward-looking statements). NSX Silver is hereby providing cautionary statements identifying important factors that could cause the actual results to differ materially from those projected in the forward-looking statements. Any statements that express, or involve discussions as to, expectations, beliefs, plans, objectives, assumptions or future events or performance (often, but not always, through the use of words or phrases such as "may", "is expected to", "anticipates", "estimates", "intends", "plans", "projection", "could", "vision", "goals", "objective" and "outlook") are not historical facts and may be forward-looking and may involve estimates, assumptions and uncertainties which could cause actual results or outcomes to differ materially from those expressed in the forward-looking statements. In making these forward-looking statements, NSX Silver has assumed that the current market for silver will continue and grow and that the risks listed below will not adversely impact the business of NSX Silver.

By their nature, forward-looking statements involve numerous assumptions, inherent risks and uncertainties, both general and specific, which contribute to the possibility that the predicted outcomes may not occur or may be delayed. The risks, uncertainties and other factors, many of which are beyond the control of NSX Silver, that could influence actual results include, but are not limited to: limited operating history; exploration, development and operating risks; regulatory risks; substantial capital requirements and liquidity; financing risks and dilution to shareholders; competition; reliance on management and dependence on key personnel; fluctuating mineral prices and marketability of minerals; title to properties; local resident concerns; no mineral reserves or mineral resources; environmental risks; governmental regulations and processing licenses and permits; management inexperience in developing mines; conflicts of interest of management; uninsurable risks; exposure to potential litigation; dividends; and other factors beyond the control of NSX Silver.

Further, any forward-looking statement speaks only as of the date on which such statement is made, and, except as required by applicable law, NSX Silver undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made or to reflect the occurrence of unanticipated events. New factors emerge from time to time, and it is not possible for management to predict all such factors and to assess in advance the impact of each such factor on the business of NSX Silver or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statement. See "Risk Factors" below.

#### **Company Overview**

NSX Silver Inc. was incorporated on August 9, 2011 under the Canada Business Corporations Act as a wholly-owned subsidiary of NSGold Corporation (NSGold). The registered office of the Company is 1055 West Hastings Street, Suite 2200, Vancouver, B.C.

NSGold, the former parent company of NSX Silver, is a mineral exploration company actively exploring for gold and base metals in Nova Scotia, Canada. In April 2011, NSGold signed an agreement whereby it secured the option to acquire a 100% ownership interest in the mining concessions comprising the Dios Padre Property, including the historic Dios Padre Silver Mine, located in Sonora State, Mexico. In July 2011, NSGold announced that it commenced the process to separate its Nova Scotia gold and base metal assets and its Mexican silver assets into two separate public companies so that NSGold could devote itself solely to exploration for gold and other metals. NSX Silver was incorporated in August 2011 as a wholly-owned subsidiary of NSGold, with the intention of taking over NSGold's exploration properties in Mexico.

On August 5, 2011, NSGold completed a private placement of 8,627,451 common shares at a price of \$0.51 per share, for gross proceeds of \$4.4 million. Sprott Asset Management LP, acting on behalf of certain Sprott funds and managed accounts, subscribed for the 8,627,451 common shares issued in the private placement, representing 19.9% of the common shares of NSGold issued and outstanding after the placement. The net proceeds from this financing were allocated to funding the activities of NSX Silver and working capital.

On October 21, 2011, NSX Silver and NSGold, as promoter, filed a preliminary prospectus with the securities commissions of each of the provinces of Canada in connection with a distribution of NSX Silver common shares to the shareholders of NSGold.

A special meeting of shareholders of NSGold was held on December 22, 2011, at which the shareholders approved a special resolution reducing NSGold's paid-up capital in connection with the "spin-out" of the shares of NSX Silver to the shareholders of NSGold. The reduction of NSGold's paid-up capital is intended to result in the distribution of the shares of NSX Silver being treated as non-taxable for most of NSGold's shareholders.

On March 1, 2012, NSX Silver obtained a receipt from the securities commissions of each of the provinces of Canada for a final prospectus dated February 28, 2012. The prospectus qualified shares of NSX Silver to be distributed by NSGold to its shareholders by way of distribution in kind.

In March 2012, NSX Silver completed the acquisition from NSGold of all of the shares of Compania Minera Oso Blanco SA de CV (CMOB) for which NSGold received one million common shares of NSX Silver. Also in March 2012, NSGold completed a share subscription agreement whereby NSGold acquired 44,428,571 common shares of NSX Silver for gross proceeds of \$4,665,000. Upon closing of the transaction, the amounts due to NSGold by each of NSX Silver for reorganization costs and CMOB for Dios Padre exploration costs were repaid and the net amount disbursed by NSGold was \$3,474,063. Contemporaneously the Dios Padre Option Agreement, complete with all its rights and obligations, was assigned to NSX Silver. CMOB has acquired, and intends to acquire, additional interests in exploration properties in Mexico.

NSGold then completed the distribution of the common shares of NSX Silver to the NSGold shareholders whereby the shareholders received one share of NSX Silver for each share of NSGold held on the record date of March 16, 2012. A total of 43,553,767 shares of NSX Silver were distributed with the distribution, effected by way of a distribution of paid up capital.

The common shares of NSX Silver commenced trading on the TSX Venture Exchange on March 14, 2012 as a Tier 2 Mining Issuer under the trading symbol NSY.

### **Resource Properties – Dios Padre Property**

NSGold entered into a definitive option agreement (the Dios Padre Option Agreement), having an effective date of April 9, 2011, whereby it could acquire 100% ownership of the **Dios Padre Property** (the Property). The Property is comprised of three contiguous mining concessions, the Dios Padre, Don Carlos and Alejandro concessions, and includes the historic Dios Padre Silver Mine. The Property encompasses 285 hectares and is located in the Municipality of Yecora, State of Sonora, Mexico approximately 260 km east of Hermosillo. Under the terms of the Dios Padre Option Agreement, NSGold, through its then wholly-owned subsidiary CMOB, had the right to acquire a 100% undivided interest in the Dios Padre Property from the optionor by making a series of escalating semi-annual cash payments totaling US\$6 million over a 5-year period and issuing an aggregate of 1,250,000 common shares to the optionor in five equal tranches over the same 5-year period. The Dios Padre Option Agreement also provides that at such time as NSGold acquires a 100% undivided interest in the Property, the optionor will be granted a 3% net smelter return royalty, two-thirds of which may be repurchased by NSGold at any time prior to the commencement of commercial production by the payment of US\$2 million.

In March 2012, NSX Silver acquired all of the shares of CMOB from NSGold and NSGold assigned the Dios Padre Option Agreement, complete with all its rights and obligations, to NSX Silver.

The Property is located in the Eastern Sierra Madre Mountain range about midway between the cities of Hermosillo and Chihuahua in east central Sonora State. Approximately 500,000 tonnes of high-grade enriched material yielding 16 million ounces of silver was reportedly mined between Jesuit operations in the 17th century, by L.V. Limited between 1860 and 1910, and by Cia. Minera Sahuaripa in the mid-1960's. More recently the Property was optioned by First Majestic Resource Corp. in 2004, which drilled a total of 17 exploratory holes before exiting the option in 2007.

The Property lies in the Sierra Madre Occidental, in a Cretaceous Volcanic Suite which is regionally grouped as the 'Lower Volcanic Sequence'. These rocks are overlain (and completely covered to the East by a Tertiary sequence of Rhyolite tuffs and basalts regionally grouped as the Upper Volcanic Sequence. The interface between these sequences, and in particular the upper parts of the Lower Volcanic Sequence, is the host environment for significant Gold and Silver districts including the nearby Sahuaripa, Mulatos, Dolores and Ocampo Districts and further south the El Sauzal Discovery. The setting of these deposits varies but they all occur within this highly prospective interval.

The Property is underlain by Cretaceous Dacite and andesite, locally intruded by the mineralized Dios Padre Porphyry (a brecciated rhyodacitic dacitic porphyry which may be partly intrusive or subvolcanic) and coeval barren dikes of similar composition. The Dios Padre Porphyry hosts the known high grade silver mineralization within the Property. It has been strongly modified by two phases of brecciation and moderate to intense argillic alteration, locally strong sericitic alteration, and infilling of leached voids by silica, barite and calcite. Silver occurs with pyrite, galena, tetrahedrite, Freibergite, sphalerite, traces of pyrargyrite and native silver. Traces of chalcopyrite are also present. Gold values range from local highs of +1 ppm in the uppermost part of the zone to less than 100 ppb in the lower portions. Copper appears to increase with depth.

In 2011 NSGold completed a comprehensive geological survey over the Dios Padre property, which included a systematic rock geochemical sampling program, a ground-based 3D Induced Polarization geophysical survey ("3DIP") and a magnetic survey done simultaneously with the 3DIP. The geophysical survey identified high-chargeability anomalies corresponding to surface geochemical anomalies of copper, gold, silver and arsenic (a pathfinder element in gold exploration). These areas are heavily altered and leached to such a degree that it is expected that much of the metallic content has been stripped away. This makes the background values encountered even more significant. One such anomaly corresponds to the site of earlier mining activities. Four additional surface anomalies were found to contain strong values of the metals noted above while one was found to be a strong lead sulfide zone.

The 3DIP geophysical survey revealed a large conductive anomaly that lies just to the north of the most recent historic mining operations striking east-west. This area appears to approach the surface and may outcrop within the geochemical anomalies. The central core of this anomaly appears as a highly-conductive mass approximately 600 meters wide by 800 meters long with a depth of at least 300 meters, which is the limit of the effective range of the survey method.

A Phase 1 drilling program was carried out during the first half of 2012 in line with the recommendation of the Company's independent geological consultant, D.R. Duncan and Associates ("DRD") of Windsor, Nova Scotia. DRD prepared a 43-101 compliant technical report for the Dios Padre Project in February 2012 and a copy of the report is available on [www.sedar.com](http://www.sedar.com) under the Company's profile.

The Phase 1 drilling program comprised 16 diamond drill holes aggregating 3,530 meters and was designed to test the geochemical and geophysical anomalies discovered during the 2011 exploration program, as well as, the areas of historic silver production. The first six drill holes were sited to test the large geophysical anomaly. They did not return significant assay results. Drill holes DP-7-2012 to DP-16-2012 were sited to test the north and northwest plunge of the mineralized breccia body previously mined in surface cuts and underground workings at the main Dios Padre Mine area. The holes were designed to test the down dip extension of the previously mined mineralized breccia zone after NSX Silver technical personnel analyzed the results of previous drill campaigns by prior explorers. Drill holes completed by Silver Standard Resources in 1996 and by First Majestic Resource Corp. in 2006 were all angled southward. However, NSX Silver geologists noticed compelling evidence for a north and northwest dip to the mineralized zone based on geologic conditions and assay patterns from both of these drill campaigns.

NSX Silver drill holes DP-07-2012 and DP-09-2102 were aimed at down dip extensions of the mineralized breccia body beneath the Santa Gertrudis open cut, and below the limits of the lowest known underground workings, known as the Santa Fe level. The Santa Gertrudis and the Santa Fe zones were reportedly last mined during the period from 1967 to 1971, with operations focusing on areas of high grade silver mineralization. Both of these drill holes successfully encountered mineralized breccia at depth. Minerals identified in the drill core from this newly discovered breccia zone include chalcopyrite, galena, tetrahedrite, freiburgite, pyrite, and barite. The mineral assemblage is consistent with silver-bearing minerals seen at upper levels of the Dios Padre Mine in pit walls, stockpiles, and accessible underground workings on the property. Holes DP-13-2012 through DP-16-2012 were drilled in and beneath the area of historic mining and were sited over a 120 meter by 70 meter area that constitutes only part of the surface foot print of the historic workings. Of particular importance is the fact that all four of these drill holes encountered significant zones of mineralization at or near surface.

The following table includes the significant drill intercepts from the Phase 1 drill program:

<b>Dios Padre Silver Project</b>

All data generated from this program together with relevant historic data gathered during the past exploration programs are being analyzed and evaluated with a view to preparing comprehensive geological model that will assist in planning the Phase 2 exploration program which will include additional drilling. This program is expected to commence in the fourth quarter of 2012.

### Resource Properties – Other

During 2011, CMOB acquired the **Oso Blanco and Oso Blanco 2 concessions** in the Municipality of Yecora, State of Sonora, Mexico. The two concessions are located in proximity to the Dios Padre, Alejandro and Don Carlos concessions. The Oso Blanco concession was acquired by request to the Mexican government on July 13, 2011 at a cost of approximately \$3,600. The Oso Blanco 2 concession was acquired by request to the Mexican government on August 30, 2011 at a cost of approximately Cdn \$3,200. The Oso Blanco concession covers an area of approximately 3,000 hectares while the Oso Blanco 2 concession covers an area of approximately 1,900 hectares.

During the first quarter of 2012, CMOB acquired by request to the Mexican government the **Piedras del Norte concession** which is located in proximity to the Dios Padre, Alejandro and Don Carlos concessions. This concession covers approximately 700 hectares.

During July 2012 NSX Silver initiated a geochemical sampling survey over a large portion of these three concessions which collectively comprise close to 6,000 hectares of ground.

### Selected Financial Information

In the first quarter of 2012, the Company completed its corporate restructuring to acquire NSGold's interest in the Dios Padre project and the Company's Mexican activities commenced in the first quarter of 2012. These first quarter results include three months of corporate activity and approximately one month of Mexican administrative activities. The second quarter includes three months for each of the corporate and Mexican activities. In the first quarter, the Company issued an initial tranche of stock options which are recorded in the accounts at fair value as estimated using the Black-Scholes pricing model. This valuation resulted in total stock-based compensation of \$261,000 of which \$71,000 was capitalized to resource properties and \$190,000 was expensed.

In 2011, the Company incurred expenses of \$18,280 relating to corporate professional fees during the initial months of operations. The Company also incurred \$137,817 associated with its corporate reorganization and listing on the TSX Venture Exchange. During the first six months of 2012, the Company incurred an additional \$105,784 bringing the total costs to \$243,601. These costs have been recorded as deferred share issue costs. The following tables contain selected financial information for the period from August 9, 2011, date of incorporation, to December 31, 2011.

	Quarter ended June 30, 2012	Quarter ended March 31, 2012	Quarter ended December 31, 2011	Period from August 9, 2011 to August 31, 2011

### **Liquidity and Capital Resources**

As at June 30, 2012, the Company had net working capital of \$2,372,594. As at December 31, 2011, the Company had no significant cash however upon closing of the Spin-out Transaction in March 2012, the Company received net proceeds of \$3,474,063 from NSGold as described in the section titled "Company Overview". It is expected that the Company's current working capital will be sufficient to fund a Phase 2 program at Dios Padre, as well as general and administrative expenses for the remainder of 2012.

The Company finances its operations through the issuance of equity securities. The Company is dependent on raising additional funding through the issuance of equity securities in order to fund future exploration programs and to meet its ongoing general and administrative requirements and while management has been successful in obtaining funding in the past, there can be no assurance that it will be able to do so in the future.

### **Off-Balance Sheet Arrangements**

The Company has no off-balance sheet arrangements.

### **Related Party Transactions**

The Company transacted with NSGold, the Company's former parent company, to distribute common shares of the Company by way of dividend to the shareholders of NS Gold. The Company also acquired the shares of CMOB from NSGold.

During the six months ended June 30, 2012 the Company incurred legal fees aggregating \$69,543 from a law firm of which one of the officers is a partner. The Company recorded \$62,439 to deferred share issue costs and \$7,103 to professional fee expense. During the period from August 9, 2011 to December 31, 2011, the Company incurred legal fees aggregating \$79,221 from this law firm. The Company recorded \$75,207 to deferred share issue costs and \$4,014 to professional fee expense.

### **Outstanding Share Data**

As at December 31, 2011, the Company had only its initial share capital of 1,000 common shares issued and outstanding. In March of 2012, the Company issued 1,000,000 common shares on its acquisition of CMOB from NSGold and also issued 44,428,571 common shares to NSGold for gross subscription proceeds of \$4,665,000 million. The shares were distributed to the NSGold shareholders whereby the shareholders received one share of NSX Silver for each share of NSGold held at the record date of March 16, 2012. In June 2012, the Company issued 250,000 common shares associated with its Dios Padre Property option agreement. As at August 27, 2012, the Company has 45,679,571 shares issued and outstanding.

As at December 31, 2011, the Company had no stock options outstanding. On March 16, 2012, the Company granted 995,000 options to directors and officers and 400,000 options to employees and consultants. These stock options vest immediately and have an exercise price of \$0.25 per share and an expiry date of March 16, 2022. The total number of options outstanding represents 3% of the issued and outstanding common shares as at August 27, 2012. The fully diluted number of common shares is 47,074,571 as at August 27, 2012.

## **Accounting Standards Issued But Not Yet Applied**

### *International Financial Reporting Standards 9, Financial Instruments (IFRS 9)*

The International Accounting Standards Board has issued IFRS 9, effective for annual periods beginning on or after January 1, 2015, with early adoption permitted. IFRS 9 introduces new classification and measurement requirements for financial instruments. NSGold continues to assess the impact of IFRS 9 on its statements of comprehensive loss and financial position.

In May 2011, the IASB issued the following standards which have not yet been adopted by the Company: IFRS 10, Consolidated Financial Statements (IFRS 10), IFRS 11, Joint Arrangements (IFRS 11), IFRS 12, Disclosure of Interests in Other Entities (IFRS 12), IAS 27, Separate Financial Statements (IAS 27), IFRS 13, Fair Value Measurement (IFRS 13) and amended IAS 28, Investments in Associates and Joint Ventures (IAS 28). Each of the new standards is effective for annual periods beginning on or after January 1, 2013 with early adoption permitted. The Company continues to assess the impact that the new and amended standards will have on its financial statements. The following is a brief summary of the new standards:

#### *IFRS 10 – Consolidation*

IFRS 10 requires an entity to consolidate an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Under existing IFRS, consolidation is required when an entity has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. IFRS 10 replaces SIC-12 Consolidation—Special Purpose Entities and parts of IAS 27 Consolidated and Separate Financial Statements.

#### *IFRS 11 – Joint Arrangements*

IFRS 11 requires a venturer to classify its interest in a joint arrangement as a joint venture or joint operation. Joint ventures will be accounted for using the equity method of accounting whereas for a joint operation the venturer will recognize its share of the assets, liabilities, revenue and expenses of the joint operation. Under existing IFRS, entities have the choice to proportionately consolidate or equity account for interests in joint ventures. IFRS 11 supersedes IAS 31, Interests in Joint Ventures, and SIC-13, Jointly Controlled Entities—Non-monetary Contributions by Venturers.

#### *IFRS 12 – Disclosure of Interests in Other Entities*

IFRS 12 establishes disclosure requirements for interests in other entities, such as joint arrangements, associates, special purpose vehicles and off balance sheet vehicles. The standard carries forward existing disclosures and also introduces significant additional disclosure requirements that address the nature of, and risks associated with, an entity's interests in other entities.

#### *IFRS 13 – Fair Value Measurement*

IFRS 13 is a comprehensive standard for fair value measurement and disclosure requirements for use across all IFRS standards. The new standard clarifies that fair value is the price that would be received to sell an asset, or paid to transfer a liability in an orderly transaction between market participants, at the measurement date. It also establishes disclosures about fair value measurement. Under existing IFRS, guidance on measuring and disclosing fair value is dispersed among the specific standards requiring fair value measurements and in many cases does not reflect a clear measurement basis or consistent disclosures.

#### *Amendments to standards*

IFRS 7, Financial Instruments: Disclosures, has been amended to include additional disclosure requirements in the reporting of transfer transactions and risk exposures relating to transfers of financial assets and the effect of those risks on an entity's financial position, particularly those involving securitization of financial assets. The amendment is applicable for annual periods beginning on or after July 1, 2011, with earlier application permitted. The Company continues to assess the impact of all other changes to IFRS 7 on its consolidated statements of loss and financial position.

## **Risks and Uncertainties**

The following are certain factors relating to the business of the Company. These risks and uncertainties are not the only ones facing the Company. Additional risks and uncertainties not currently known to the Company, or that the Company currently deems immaterial, may also impair the operations of the Company. If any such risks actually occur, the financial condition, liquidity and results of operations of the Company could be materially adversely affected and the ability of the Company to implement its growth plans could be adversely affected.

The following is a description of certain risks and uncertainties that may affect the business of the Company.

### **i. Limited Operating History**

The Company is a relatively new company with limited operating history and no history of business or mining operations, revenue generation or production history. The Company was incorporated August 9, 2011 and has yet to generate a profit from its activities. The Company will be subject to all of the business risks and uncertainties associated with any new business enterprise, including the risk that it will not achieve its growth objective. The Company anticipates that it may take several years to achieve positive cash flow from operations.

### **ii. Exploration, Development and Operating Risks**

The exploration for and development of minerals involves significant risks, which even a combination of careful evaluation, experience and knowledge may not eliminate. Few properties which are explored are ultimately developed into producing mines. There can be no guarantee that the estimates of quantities and qualities of minerals disclosed will be economically recoverable. With all mining operations there is uncertainty and, therefore, risk associated with operating parameters and costs resulting from the scaling up of extraction methods tested in pilot conditions. Mineral exploration is speculative in nature and there can be no assurance that any minerals discovered will result in an increase in the Company's resource base.

The Company's operations are subject to all of the hazards and risks normally encountered in the exploration, development and production of minerals. These include unusual and unexpected geological formations, rock falls, seismic activity, flooding and other conditions involved in the extraction of material, any of which could result in damage to, or destruction of, mines and other producing facilities, damage to life or property, environmental damage and possible legal liability. Although precautions to minimize risk will be taken, operations are subject to hazards that may result in environmental pollution and consequent liability that could have a material adverse impact on the business, operations and financial performance of the Company.

### **iii. Substantial Capital Requirements and Liquidity**

Substantial additional funds for the establishment of the Company's current and planned mining operations will be required. No assurances can be given that the Company will be able to raise the additional funding that may be required for such activities, should such funding not be fully generated from operations. Mineral prices, environmental rehabilitation or restitution, revenues, taxes, transportation costs, capital expenditures, operating expenses and geological results are all factors which will have an impact on the amount of additional capital that may be required. To meet such funding requirements, the Company may be required to undertake additional equity financing, which would be dilutive to shareholders. Debt financing, if available, may also involve restrictions on financing and operating activities. There is no assurance that additional financing will be available on terms acceptable to the Company or at all. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations or anticipated expansion, and pursue only those development plans that can be funded through cash flows generated from its existing operations.

### **iv. Fluctuating Mineral Prices**

The economics of mineral exploration is affected by many factors beyond the Company's control, including commodity prices, the cost of operations, variations in the grade of minerals explored and fluctuations in the market price of minerals. Depending on the price of minerals, it may be determined that it is impractical to continue the mineral exploration operation.

Mineral prices are prone to fluctuations and the marketability of minerals is affected by government regulation relating to price, royalties, allowable production and the importing and exporting of minerals, the effect of which

cannot be accurately predicted. There is no assurance that a profitable market will exist for the sale of any minerals found on the Company's properties.

**v. Regulatory Requirements**

The current or future operations of the Company require permits from various governmental authorities, and such operations are and will be governed by laws and regulations governing exploration, development, production, taxes, labour standards, occupational health, waste disposal, toxic substances, land use, environmental protection, site safety and other matters. Companies engaged in the exploration and development of mineral properties generally experience increased costs and delays in development and other schedules as a result of the need to comply with applicable laws, regulations and permits. There can be no assurance that all permits which the Company may require for the facilities and conduct of exploration and development operations will be obtainable on reasonable terms or that such laws and regulation would not have an adverse effect on any exploration and development project which the Company might undertake.

Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment or remedial actions. Parties engaged in exploration and development operations may be required to compensate those suffering loss or damage by reason of the exploration and development activities and may have civil or criminal fines or penalties imposed upon them for violation of applicable laws or regulations. Amendments to current laws, regulation and permits governing operations and activities of mineral companies, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in capital expenditures or exploration and development costs or require abandonment or delays in the development of new properties.

**vi. Financing Risks and Dilution to Shareholders**

The Company has limited financial resources, no operations and no revenues. If the Company's exploration program on its exploration properties is successful, additional funds will be required for the purposes of further exploration and development. There can be no assurance that the Company will be able to obtain adequate financing in the future or that such financing will be available on favourable terms or at all. It is likely such additional capital will be raised through the issuance of additional equity, which will result in dilution to the Company's shareholders.

**vii. Title to Properties**

Acquisition of title to mineral properties is a very detailed and time-consuming process. Title to, and the area of, mineral properties may be disputed. The Company cannot give an assurance that title to its exploration properties will not be challenged or impugned. Mineral properties sometimes contain claims or transfer histories that examiners cannot verify. A successful claim that NSX Silver does not have title to its exploration properties could cause the Company to lose any rights to explore, develop and mine any minerals on that property, without compensation for its prior expenditures relating to such property.

**viii. Requirement for Permits and Licenses**

A substantial number of permits and licenses may be required should the Company proceed beyond exploration; such licenses and permits may be difficult to obtain and may be subject to changes in regulations and in various operational circumstances. It is uncertain whether the Company will be able to obtain all such licenses and permits.

**ix. Competition**

There is competition within the mining industry for the discovery and acquisition of properties considered to have commercial potential. The Company competes with other mining companies, many of which have greater financial, technical and other resources than the Company, for, among other things, the acquisition of minerals claims, leases and other mineral interests as well as for the recruitment and retention of qualified employees and other personnel.

**x. Reliance on Management and Dependence on Key Personnel**

The success of the Company will be largely dependent upon on the performance of its directors and officers and the ability to attract and retain key personnel. The loss of the services of these persons may have a material adverse

effect on the Company's business and prospects. The Company will compete with numerous other companies for the recruitment and retention of qualified employees and contractors. There is no assurance that the Company can maintain the service of its directors and officers or other qualified personnel required to operate its business. Failure to do so could have a material adverse effect on the Company and its prospects.

**xi. No Mineral Reserves**

Mineral reserves are, in the large part, estimates and no assurance can be given that the anticipated tonnages and grades will be achieved or that the indicated level of recovery will be realized. Reserve estimates for properties that have not yet commenced production may require revision based on actual production experience. Market price fluctuations of metals, as well as increased production costs or reduced recovery rates, may render mineral reserves containing relatively lower grades of mineralization uneconomic and may ultimately result in a restatement of reserves. Moreover, short-term operating factors relating to the mineral reserves, such as the need for orderly development of the ore bodies and the processing of new or different mineral grades, may cause a mining operation to be unprofitable in any particular accounting period.

**xii. Environmental Risks**

The Company's exploration and appraisal programs will, in general, be subject to approval by regulatory bodies. Additionally, all phases of the mining business present environmental risks and hazards and are subject to environmental regulation pursuant to a variety of international conventions and federal, provincial and municipal laws and regulations. Environmental legislation provides for, among other things, restrictions and prohibitions on spills, releases or emissions of various substances produced in association with mining operations. The legislation also requires that wells and facility sites be operated, maintained, abandoned and reclaimed to the satisfaction of applicable regulatory authorities. Compliance with such legislation can require significant expenditures and a breach may result in the imposition of fines and penalties, some of which may be material. Environmental legislation is evolving in a manner expected to result in stricter standards and enforcement, larger fines and liability and potentially increased capital expenditures and operating costs.

**xiii. Governmental Regulations and Processing Licenses and Permits**

The activities of the Company are subject to Mexican approvals, various laws governing prospecting, development, land resumptions, production taxes, labour standards and occupational health, mine safety, toxic substances and other matters. Although the Company believes that its activities are currently carried out in accordance with all applicable rules and regulations, no assurance can be given that new rules and regulations will not be enacted or that existing rules and regulations will not be applied in a manner which could limit or curtail production or development. Amendments to current laws and regulations governing operations and activities of exploration and mining, or more stringent implementation thereof, could have a material adverse impact on the business, operations and financial performance of the Company. Further, the mining licenses and permits issued in respect of its projects may be subject to conditions which, if not satisfied, may lead to the revocation of such licenses. In the event of revocation, the value of the Company's investments in such projects may decline.

**xiv. Local Resident Concerns**

Apart from ordinary environmental issues, work on, or the development and mining of the Dios Padre property could be subject to resistance from local residents that could either prevent or delay exploration and development of the property.

**xv. Management Inexperience in Developing Mines**

The management of the Company has some experience in exploring for minerals, but may lack all or some of the necessary technical training and experience to successfully develop and operate a mine. Without adequate training or experience in these areas, management may not be fully aware of many of the specific requirements related to working within the mining industry and their decisions and choices may not take into account all available and necessary engineering or managerial approaches that experienced mine operating companies commonly use to successfully develop a mine. Consequently, the Company's operations, earnings and ultimate financial success could be materially adversely effected.

**xvi. Conflicts of Interest**

Certain of the directors and officers of the Company are engaged in, and will continue to engage in, other business activities on their own behalf and on behalf of other companies (including mineral resource companies) and, as a result of these and other activities, such directors and officers of the Company may become subject to conflicts of interest. The Canada Business Corporations Act (CBCA) provides that in the event that a director has a material interest in a contract or proposed contract or agreement that is material to the Company, the director must disclose his interest in such contract or agreement and refrain from voting on any matter in respect of such contract or agreement, subject to and in accordance with the CBCA. To the extent that conflicts of interest arise, such conflicts will be resolved in accordance with the provisions of the CBCA.

**xvii. Uninsurable Risks**

Exploration, development and production operations on mineral properties involve numerous risks, including unexpected or unusual geological operating conditions, rock bursts, cave-ins, fires, floods, earthquakes and other environmental occurrences. It is not always possible to obtain insurance against all such risks and the Company may decide not to insure against certain risks as a result of high premiums or other reasons. Should such liabilities arise, they could have an adverse impact on the Company's results of operations and financial condition and could cause a decline in the value of the Company's shares. The Company does not intend to maintain insurance against environmental risks.

**xviii. Litigation**

The Company and/or its directors may be subject to a variety of civil or other legal proceedings, with or without merit.

**xix. Dividends**

To date, NSX Silver has not paid any dividends on its outstanding shares. Any decision to pay dividends on the shares of the Company will be made by its board of directors on the basis of the Company's earnings, financial requirements and other conditions.

Additional information regarding the Company is available on SEDAR at [www.sedar.com](http://www.sedar.com).

## **Management's Report**

The accompanying interim unaudited condensed consolidated financial statements of **NSX Silver Inc.** are the responsibility of management and have been approved by the Board of Directors. The interim unaudited condensed consolidated financial statements have been prepared by management in accordance with International Financial Reporting Standards ("IFRS"). The interim unaudited condensed consolidated financial statements include certain amounts and assumptions that are based on management's best estimates and have been derived with careful judgment.

In fulfilling its responsibilities, management has developed and maintains a system of internal accounting controls. These controls are designed to provide reasonable assurance that the financial records are reliable for preparation of the financial statements. The Audit Committee of the Board of Directors reviewed and approved the Company's interim unaudited condensed consolidated financial statements, and recommended their approval by the Board of Directors.

These interim unaudited condensed consolidated financial statements have not been reviewed by the external auditors of the Company.

# **NSX Silver Inc.**

## **Unaudited Interim Condensed Consolidated Notes to Financial Statements**

**For the six months ended June 30, 2012**

---

(expressed in Canadian dollars)

### **1 Nature of operations and going concern**

#### **Nature of operations**

NSX Silver Inc. (the "Company") was incorporated under the Canada Business Corporations Act on August 9, 2011 as a wholly owned subsidiary of NSGold Corporation ("NSGold"). Its principal business activities will be the acquisition, exploration and development of resource properties in Mexico (see note 4). The Company's registered office is located at 1055 West Hastings Street in Vancouver, British Columbia.

The common shares of the Company commenced trading on the TSX Venture Exchange on March 14, 2012 as a Tier 2 Mining Issuer under the trading symbol NSY.

#### **Going concern**

The Company's financial statements as at June 30, 2012 have been prepared on the basis of International Financial Reporting Standards applicable to a going concern, which contemplates the realization of assets and the settlement of liabilities and commitments in the normal course of business. There are material uncertainties that may cast significant doubt about the appropriateness of the going concern assumption as the Company incurred a net loss for the period of \$324,254 (August 9, 2011 to December 31, 2011 - \$18,280) and has no operations at this time which will generate revenue. In the first quarter of 2012, the Company filed a non-offering prospectus, through which, among other things, the Company received net proceeds of approximately \$3.5 million. These funds, while significant, may not be sufficient to fund the Corporation's planned exploration expenditures over the next twelve months. Accordingly, the Company may need to raise additional financing. Management cannot provide assurance that the Company will ultimately achieve profitable operations, become cash flow positive, or raise additional debt and/or equity capital. These financial statements do not include any adjustments related to the recoverability and classification of assets or the amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern, and these adjustments could be material.

### **2 Basis of presentation and accounting policies**

#### **a) Basis of presentation**

The Company prepares its unaudited interim condensed consolidated financial statements (the "financial statements") in accordance with generally accepted accounting principles in Canada ("GAAP"), as set out in the Handbook of the Canadian Institute of Chartered Accountants - Part 1 ("CICA Handbook") which incorporates International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

# NSX Silver Inc.

## Unaudited Interim Condensed Consolidated Notes to Financial Statements For the six months ended June 30, 2012

---

(expressed in Canadian dollars)

### **2 Basis of presentation and accounting policies** (continued)

#### **a) Basis of presentation** (continued)

These financial statements are in compliance with International Accounting Standard 34, *Interim Financial Reporting* ("IAS 34"). Accordingly, certain information normally included in annual financial statements prepared in accordance with IFRS, as issued by the IASB, have been omitted or condensed. The preparation of financial statements in accordance with IAS 34 requires the use of certain critical accounting estimates. It also requires management to exercise judgement in applying the Company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements have been set out in note 2 of the Company's financial statements for the year ended December 31, 2011. These financial statements should be read in conjunction with the Company financial statements for the year ended December 31, 2011.

These financial statements include all adjustments, composed of normal recurring adjustments, considered necessary by management to fairly state the Company's results of operations, financial position and cash flows. The operating results for interim periods are not necessarily indicative of results that may be expected for any other interim period or for the full year.

These financial statements have been authorized for issuance by the Board of Directors on August 27, 2012.

#### **b) Basis of measurement**

These financial statements are presented in Canadian dollars, which is the Company's functional currency.

#### **c) Use of estimates and judgments**

The preparation of the financial statements requires the Company's management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. The determination of estimates requires the exercise of judgment based on various assumptions and other factors such as historical experience and current and expected economic conditions. Actual results may differ from these estimates.

#### *Recoverability of resource properties*

The Company assesses all resource properties at each reporting period date to determine whether any indication of impairment exists. Where an indicator of impairment exists, a formal estimate of the recoverable amount is made, which is considered to be the higher of the fair value less costs to sell and value in use. These assessments require the use of estimates and assumptions such as long-term commodity prices, future capital requirements, exploration potential and operating performance.

# NSX Silver Inc.

## Unaudited Interim Condensed Consolidated Notes to Financial Statements For the six months ended June 30, 2012

---

(expressed in Canadian dollars)

### 2 Basis of presentation and accounting policies (continued)

#### c) Use of estimates and judgements (continued)

##### *Fair value of assets acquired from NSGold (note 4)*

The estimation of the fair value of assets acquired is determined based on the fair value of the assets received from NSGold in return for shares of the Company. The determination of the fair value requires the exercise of judgment based on various assumptions and other factors such as historical experience and current and expected economic conditions. A \$0.01 difference in the per share value allocated to the Company's shares, issued to NSGold, would impact the fair value of the assets acquired by approximately \$500,000.

### 3 Significant accounting policies

These financial statements are based on the accounting policies consistent with those disclosed in note 3 to the 2011 financial statements. Refer also to note 3 for information on new accounting standards and amendments not yet effective.

New accounting policies adopted with the Company's acquisition of its subsidiary, Compania Minera Oso Blanco SA de CV (CMOB) and its Dios Padre Property are summarized below:

#### **Consolidation**

The financial statements of the Company consolidate the accounts of the Company and its subsidiary CMOB. All intercompany transactions, balances and unrealized gains and losses from intercompany transactions are eliminated on consolidation. There are no non-controlling interests therefore all loss and comprehensive loss is attributable to the shareholders of the Company.

#### **Resources properties**

Initial acquisition costs and exploration and development costs related to resource properties are deferred until such time as the properties are put into commercial production, sold or abandoned or management determines that the resource properties are not economically viable, at which time the resource properties are written down to their recoverable amount. Under this method, all amounts shown as resource properties represent costs incurred to date less amounts amortized, received from exploration partners and/or written down, and do not necessarily represent present or future values.

If any properties are put into commercial production, the carrying values of the properties will be depleted following the unit of production method. If any properties are sold or abandoned, or considered to be impaired in value, the carrying value of the properties will be charged to operations.

The carrying values of resource properties, on a property-by-property basis, will be reviewed by management at least annually to determine if they have become impaired. If impairment is deemed to exist, the resource properties will be written down to their recoverable amount. The ultimate recoverability of the amounts capitalized for the resource properties is dependent upon obtaining the necessary financing to complete their development and realize profitable production or proceeds from the disposition thereof.

# **NSX Silver Inc.**

## **Unaudited Interim Condensed Consolidated Notes to Financial Statements**

**For the six months ended June 30, 2012**

---

(expressed in Canadian dollars)

### **3 Significant accounting policies** (continued)

#### **Resources properties**

Management's estimate of recoverability of the Company's resource property has been based on current conditions. However, it is reasonably possible that changes could occur in the near term which could adversely affect management's estimates and may result in future write-downs of the resource property.

#### **Capital management**

The Company's capital structure consists of share capital, warrants, deficit and contributed surplus, which at June 30, 2012 totalled \$5,507,465. The Company's objective when managing capital is to maintain adequate levels of funding to support the acquisition and exploration of resource properties and maintain the necessary corporate and administrative functions to facilitate these activities. This is done primarily through equity financing. Future financings are dependent on market conditions and there can be no assurance the Company will be able to raise funds in the future.

The Company invests all capital that is surplus to its immediate operational needs in short-term, highly-liquid, high-grade financial instruments. There were no changes to the Company's approach to capital management during the year. The Company is not subject to externally imposed capital requirements.

#### **Functional and presentation currency and foreign currency translation**

Items included in the consolidated financial statements are measured using the currency of the primary economic environment in which the entity operates and the consolidated financial statements are presented in Canadian dollars. The functional currency of all subsidiaries and the parent company are Canadian dollars. Foreign currency transactions are recorded at the foreign exchange rate in effect on the date of the transaction and gains and losses resulting from the settlement of such transactions are recorded in the statement of loss and comprehensive loss.

#### **Stock-based compensation**

The Company accounts for stock options using the fair value method. The estimated fair value of all stock options granted is recorded in the statement of loss over their vesting periods.

The Company grants stock options to certain officers and directors. Stock options vest in accordance with the individual option granting contracts and expire after five years. Each tranche in an award is considered a separate award with its own vesting period and grant date fair value. Fair value of each tranche is measured at the date of grant using Black-Scholes option pricing model. Compensation expense is recognized over the tranche's vesting period by increasing contributed surplus based on the number of awards expected to vest. The number of awards expected to vest is reviewed at least annually, with any impact being recognized immediately. Consideration paid by the directors and officers upon exercise of the stock options and the amount previously recognized in contributed surplus are recorded as share capital.

# NSX Silver Inc.

## Unaudited Interim Condensed Consolidated Notes to Financial Statements

For the six months ended June 30, 2012

---

(expressed in Canadian dollars)

### 4 Share subscription agreement with NSGold Corporation, acquisition of shares of Compañía Minera Oso Blanco SA de CV and distribution of the Company's shares

On February 28, 2012, the Company filed a non-offering prospectus with the securities commissions of each of the provinces of Canada, relating to the qualification and distribution of common shares of the Company by NSGold (the former parent company of the Company) to its shareholders by way of distribution in kind. The shareholders of NSGold approved a special resolution reducing NSGold's paid-up capital in connection with the "spin-out" of the shares of the Company to the shareholders of NSGold at a special meeting of the shareholders held on December 22, 2011.

In association with this spin-out and prior to the subscription of common shares of the Company by NSGold, the Company completed the acquisition of the shares of Compañía Minera Oso Blanco SA de CV (CMOB), a wholly owned subsidiary of NSGold, for one million common shares of the Company. The acquisition has been recorded as a purchase of assets which has been recorded based on the fair value of the assets of CMOB. Also, in March 2012, the Company completed a share subscription agreement with NSGold whereby NSGold acquired 44,428,571 common shares of the Company for gross proceeds of \$4,665,000, net of share issue costs of \$243,601.

NSGold then completed the distribution of the common shares of the Company to the NSGold shareholders whereby the shareholders received one share of the Company for each share of NSGold held as of the record date of March 16, 2012. A total of 43,553,767 shares of the Company were distributed to the shareholders of NSGold with the distribution effected by way of a distribution of paid up capital of NSGold. After the distribution, NSGold holds 1,875,804 shares of the Company.

The common shares of the Company commenced trading on the TSX Venture Exchange on March 14, 2012 as a Tier 2 Mining Issuer under the trading symbol NSY.

The net assets of the Company and CMOB on the date of spin-out by NSGold are summarized as follows:

	\$
<b>Assets acquired</b>	
Cash	4,560,137
Sales tax recoverable	37,862
Capital assets	15,432
Resource properties	<u>2,159,644</u>
	6,773,075
<b>Less liabilities assumed</b>	<u>(1,246,676)</u>
	<u>5,526,399</u>

#### a) Dios Padre Property Option Agreement

In connection with the purchase by the Company of the shares of CMOB, all of the rights and obligations of NSGold under a Property Option Agreement dated April 9, 2011 (see below) were assigned to the Company, so that the Company thereafter will issue shares and make cash payments to the optionor, as the case may be. The optionor has consented to such assignment.

Under the Property Option Agreement, the Company, through its subsidiary CMOB, has the exclusive right to acquire a 100% undivided interest in three mining concessions in Mexico (Dios Padre, Don Carlos and Alejandro) from the optionor. The Property, including the historic Dios Padre Silver Mine, is located in the Municipality of Yecora, State of Sonora, Mexico approximately 260 km east of Hermosillo. Under the terms of the Property Option Agreement, the Company can acquire this 100% undivided interest by making cash payments totaling US\$6 million over a 5-year period and issuing an aggregate of 1,250,000 common shares to the optionor in five equal tranches over the same 5-year period. Prior to the acquisition of CMOB by the Company, NSGold paid US\$175,000 and issued 250,000 common shares to the optionor. Since its acquisition of CMOB, the Company has paid US\$75,000 and issued 250,000 common shares to the optionor. In order to acquire a 100% interest, the Company must make the balance of the cash payments in the amount of US\$5,750,000 and issue the remaining one million shares. The dates for the remaining option payments are as follows:

	\$'000
January 31, 2013	250
July 31, 2013	250
January 31, 2014	300
July 31, 2014	300
January 31, 2015	500
July 31, 2015	500
January 31, 2016	3,650

The next share issuance to the optionor due under the Property Option Agreement is 250,000 shares by June 8, 2013. The Company must make a bonus payment to the optionor of US\$1 million, if the Company publishes a measured and indicated resource on the properties which includes a contained silver content in excess of 50 million ounces, and must make a bonus payment to the optionor of US\$2 million if the Company publishes a measured and indicated resource on the properties which includes a contained silver

content in excess of 100 million ounces. Once the Company acquires a 100% undivided interest in the three concessions, the optionor will be granted a 3% net smelter return royalty, two-thirds of which may be repurchased by the Company for US\$2 million at any time prior to the commencement of commercial production.

<b>Balance – June 30, 2012</b>	<b>45,679,571</b>	<b>5,588,999</b>

#### b) Options

The Company has adopted a stock option plan for directors, officers, employees and consultants of the Company, providing the Board of Directors with the discretion to issue up to 3,000,000 common shares. The exercise price of the stock options is determined by the Board of Directors when the options are granted, but cannot be less than the closing price of the Company's shares on the TSX Venture Exchange on the business day immediately preceding the day on which the option is granted. The maximum exercise period of the stock options is ten years.

During the quarter ended March 31, 2012, the Company granted 1,395,000 stock options with an exercise price of \$0.25. These options vest immediately and expire in ten years. The fair value of these options was estimated using the Black-Scholes pricing model based on a volatility of 100%, risk-free rate of 2% and expected lives of 5 years with no dividend yield. This valuation resulted in total stock-based compensation during the quarter ended March 31, 2012 of \$261,000 of which \$71,000 was capitalized to mineral properties and \$190,000 was expensed in the first quarter of 2012.
