## NSX SILVER INC.

### MANAGEMENT'S DISCUSSION AND ANALYSIS FOR THE YEAR ENDED DECEMBER 31, 2013

#### **Background**

This Management's Discussion and Analysis (MD&A) of NSX Silver Inc. (NSX Silver or the Company) is dated April 30, 2014 and provides an analysis of the financial operating results for the year ended December 31, 2013 and December 31, 2012. This MD&A should be read in conjunction with the audited annual financial statements and accompanying notes for the year ended December 31, 2013 which have been prepared in accordance with International Financial Reporting Standards (IFRS) for consolidated financial statements. All amounts are in Canadian dollars unless otherwise specified. The financial statements and additional information, including news releases and technical reports referenced herein, are available on the Canadian System for Electronic Document Analysis and Retrieval (SEDAR) at [www.sedar.com](http://www.sedar.com) under the Company's profile. The common shares of NSX Silver are traded on the TSX Venture Exchange under the symbol "NSY". More extensive information on NSX Silver can be found on its website at [www.nsxsilver.com](http://www.nsxsilver.com).

#### **Forward-Looking Information**

Certain statements in this MD&A are forward-looking statements or information (collectively- forward-looking statements). NSX Silver is hereby providing cautionary statements identifying important factors that could cause the actual results to differ materially from those projected in the forward-looking statements. Any statements that express, or involve discussions as to, expectations, beliefs, plans, objectives, assumptions or future events or performance (often, but not always, through the use of words or phrases such as "may", "is expected to", "anticipates", "estimates", "intends", "plans", "projection", "could", "vision", "goals", "objective" and "outlook") are not historical facts and may be forward-looking and may involve estimates, assumptions and uncertainties which could cause actual results or outcomes to differ materially from those expressed in the forward-looking statements. In making these forward-looking statements, NSX Silver has assumed that the current market for silver will continue and grow and that the risks listed below will not adversely impact the business of NSX Silver.

By their nature, forward-looking statements involve numerous assumptions, inherent risks and uncertainties, both general and specific, which contribute to the possibility that the predicted outcomes may not occur or may be delayed. The risks, uncertainties and other factors, many of which are beyond the control of NSX Silver, that could influence actual results include, but are not limited to: limited operating history; exploration, development and operating risks; regulatory risks; substantial capital requirements and liquidity; financing risks and dilution to shareholders; competition; reliance on management and dependence on key personnel; fluctuating mineral prices and marketability of minerals; title to properties; local resident concerns; no mineral reserves or mineral resources; environmental risks; governmental regulations and processing licenses and permits; management inexperience in developing mines; conflicts of interest of management; uninsurable risks; exposure to potential litigation; dividends; and other factors beyond the control of NSX Silver.

Further, any forward-looking statement speaks only as of the date on which such statement is made, and, except as required by applicable law, NSX Silver undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made or to reflect the occurrence of unanticipated events. New factors emerge from time to time, and it is not possible for management to predict all such factors and to assess in advance the impact of each such factor on the business of NSX Silver or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statement. See "Risk and Uncertainties".

#### **Company Overview**

NSX Silver Inc. was incorporated on August 9, 2011 under the Canada Business Corporations Act as a wholly-owned subsidiary of NSGold Corporation (NSGold). The registered office of the Company is 1055 West Hastings Street, Suite 2200, Vancouver, B.C.

NSGold, the former parent company of NSX Silver, is a mineral exploration company actively exploring for gold and base metals in Nova Scotia, Canada. In April 2011, NSGold signed an agreement whereby it secured the option to acquire a 100% ownership interest in the three mining concessions comprising the Dios Padre Property, including

the historic Dios Padre Silver Mine, located in Sonora State, Mexico. In July 2011, NSGold announced that it commenced the process to separate its Nova Scotia gold and base metal assets and its Mexican silver assets into two separate public companies so that NSGold could devote itself solely to exploration for gold and other metals. NSX Silver was incorporated in August 2011 as a wholly-owned subsidiary of NSGold, with the intention of taking over NSGold's exploration properties in Mexico.

On August 5, 2011, NSGold completed a private placement of 8,627,451 common shares at a price of \$0.51 per share, for gross proceeds of \$4.4 million. Sprott Asset Management LP, acting on behalf of certain Sprott funds and managed accounts, subscribed for the 8,627,451 common shares issued in the private placement, representing 19.9% of the common shares of NSGold issued and outstanding after the placement. The net proceeds from this financing were allocated to funding the activities of NSX Silver and working capital.

On October 21, 2011, NSX Silver and NSGold, as promoter, filed a preliminary prospectus with the securities commissions of each of the provinces of Canada in connection with a distribution of NSX Silver common shares to the shareholders of NSGold. A special meeting of shareholders of NSGold was held on December 22, 2011, at which the shareholders approved a special resolution reducing NSGold's paid-up capital in connection with the "spin-out" of the shares of NSX Silver to the shareholders of NSGold. The reduction of NSGold's paid-up capital is intended to result in the distribution of the shares of NSX Silver being treated as non-taxable for most of NSGold's shareholders.

On March 1, 2012, NSX Silver obtained a receipt from the securities commissions of each of the provinces of Canada for a final prospectus dated February 28, 2012. The prospectus qualified shares of NSX Silver to be distributed by NSGold to its shareholders by way of distribution in kind.

In March 2012, NSX Silver completed the acquisition from NSGold of all of the shares of Compania Minera Oso Blanco SA de CV (CMOB) for which NSGold received one million common shares of NSX Silver. Also in March 2012, NSGold completed a share subscription agreement whereby NSGold acquired 44,428,571 common shares of NSX Silver for gross proceeds of \$4,665,000. Upon closing of the transaction, the amounts due to NSGold by each of NSX Silver for reorganization costs and CMOB for Dios Padre exploration costs were repaid and the net amount disbursed by NSGold was \$3,474,063. Contemporaneously the Dios Padre Option Agreement, complete with all its rights and obligations, was assigned to NSX Silver.

NSGold then completed the distribution of the common shares of NSX Silver to the NSGold shareholders whereby the shareholders received one share of NSX Silver for each share of NSGold held on the record date of March 16, 2012. A total of 43,553,767 shares of NSX Silver were distributed with the distribution, effected by way of a distribution of paid up capital.

The common shares of NSX Silver commenced trading on the TSX Venture Exchange on March 14, 2012 as a Tier 2 Mining Issuer under the trading symbol "NSY".

During the third quarter of 2013, the Company completed a strategic review of its Mexican exploration property portfolio, taking into consideration the exploration results generated to date and an evaluation of the risk-reward profile associated with undertaking further exploration for each of its mining concessions. As a result of this review, the directors of NSX Silver determined that the Company's future exploration efforts would be best positioned by focusing on its three wholly-owned mining concessions (Oso Blanco, Oso Blanco 2 and Piedras del Norte) comprising approximately 6,000 hectares and located in Sonora State. The work completed on these concessions to date has identified several mineralized zones which NSX Silver's technical consultants consider to have excellent potential for further discoveries.

With respect to the Dios Padre Property, comprised of the Dios Padre, Dos Carlos and Alajandro mining concessions totaling 285 hectares, while the 2012 and 2013 drill campaigns generated multiple high grade silver intercepts, it has not as yet delivered the makings of an economic deposit and accordingly NSX Silver informed the property owner that it was terminating the option agreement. As a result, the Company recorded a write-down on its Dios Padre resource property in the amount of \$4.6 million.

## Resource Properties – Oso Blanco Project

NSX Silver holds a 100% interest in three contiguous mining concessions (Oso Blanco, Oso Blanco 2 and Piedras del Norte) comprising approximately 5,600 hectares of prospective ground located in Sonora State, Mexico. Collectively these concessions are referred to as the Oso Blanco Property. Geological mapping and geochemical sampling has identified several anomalous zones. Sampling has returned impressive precious and base metals values with the highest precious metal values being 2,030 gpt silver and 9.4 gpt gold. None of the mineralized showings have yet been drill tested.

The Oso Blanco Property is situated approximately midway between the cities of Hermosillo and Chihuahua in the Sierra Madre Occidental (“SMO”) in a cretaceous volcanic suite, which is regionally denoted as the “Lower Volcanic Sequence”. These rocks are overlain and completely covered to the East by a tertiary sequence of rhyolite tuffs and basalts regionally known as the “Upper Volcanic Sequence”. The interface between these sequences, and in particular the upper parts of the Lower Volcanic Sequence, is the host environment for several significant gold and silver districts including the nearby Sahuaripa, Mulatos, Dolores and Ocampo Districts and further south the El Sauzal discovery. The geologic setting of these deposits varies but they all occur at or within this highly prospective interface.

During July 2012 NSX Silver initiated a geochemical sampling survey over a large portion of these three concessions. In particular, the Company was attracted to the previously unexplored **Huerigo Zone** on the Oso Blanco II concession by alteration in surface rocks that is similar to the Dios Padre Property. The Huerigo area comprises 8 km<sup>2</sup> of highly prospective ground in the western portion of the Oso Blanco II concession and is located approximately 5 kilometers west-southwest of the historic Dios Padre Silver Mine. A total of five highly prospective areas (i.e. anomalous zones) have been identified in the Huerigo area. Silver values up to 545 grams per tonne were returned from the rock chip samples in this area and four large poly-metallic anomalies were also discovered.

In December 2012, the Company completed its Phase 2 geochemical survey conducted on the Oso Blanco II concession. The survey covered the Huerigo Zone and other silver-lead-copper anomalies discovered during the Phase I geochemical survey. The Phase 2 program successfully delineated the Huerigo Zone in detail and confirmed the internal consistency and intensity of the silver anomaly.

The Phase 2 program covered 800 hectares of the Oso Blanco II concession and was designed to increase sample density and provide detailed information regarding the size, shape, and intensity of the anomalies. A total of 941 rock chip surface samples were taken during the two programs. In known anomalous zones rock chip samples were taken on a 50 meter grid with 25 meter sample spacing and at any changes in lithology or alteration. Previously unexplored ground was sampled on a 100 meter grid with 50 meter sample spacing and at any change in lithology or alteration.

Anomalous zones were defined by elevated silver-lead-copper assay values supported by multi-element assay values that exceed the statistical background populations. Background levels for silver, lead, and copper are 1.3, 18, and 20 ppm respectively. The main Huerigo metal anomaly occurs as an arcuate 900X300 meter multi-point silver anomaly, supported by coincident anomalous lead and copper values. Silver values range from background to a maximum of 545 grams per tonne, with lead values reaching 2.05% and copper reaching 2.1%. Of the total 941 samples tested, an impressive 302 samples (32%) contained anomalous silver, copper, and lead.

The Phase 2 program also identified additional silver-lead-copper anomalies on the concession. Certain of these zones were evaluated by trenching, geologic mapping, and detailed geochemical sampling.

In May 2013, the Company announced the initial results from its ongoing detailed mapping and sampling program on the **Santa Rosalita Zone** located on the Oso Blanco concession and the **La Prieta Zone** located on the Piedras del Norte concession. In June, 2013, the Company reported results from its ongoing geochemical sampling and mapping program on the Huerigo area. These efforts focussed on two zones; the **Los Tajos Zone** to the south and the **Chipahuiri Zone** to the north. These zones are located approximately 5 kilometers apart and both have had only limited exploration conducted in the past.

Highlight results from these recent exploration programs are outlined in the following sections.

### Santa Rosalita Zone

The Santa Rosalita Zone is a newly discovered mineralized zone located immediately north of the town of Santa Rosa. Mineralization in this zone occurs in a shear zone of indeterminate size that is obscured by heavy overburden in an area with difficult access due to dense vegetation. Significant values obtained during initial sampling in this zone include the following:

Sample #	Gold (gpt)	Silver (gpt)	Copper (%)	Lead (%)	Zinc (%)
<b>170410</b>	0.01	<b>2,030</b>	0.31%	1.26%	0.14%
<b>170409</b>	0.01	93	0.24%	0.48%	0.69%

This zone appears to be in close proximity to a large quartz monzonite intrusive body that lies to the south-southwest. The significance of this is that quartz monzonite is a primary host for a number of porphyry copper deposits in western Canada, the United States, and Mexico. Many of these type of deposits are known to have high grade precious metal occurrences on or near their peripheries. Considerable work remains to be done to confirm the potential for porphyry copper mineralization at or near the Santa Rosalita Zone.

### La Prieta Zone

La Prieta is a strong shear zone with veins containing silver and it is one of the more prominent silver occurrences located near Santa Rosalita. This mineralized zone is located on the Piedras del Norte concession. The vein system at La Prieta was previously mined during the early 1900's and a substantial dual compartment inclined shaft has been found. Investigation of rocks on the dump resulted in identification of diorite and quartz diorite intrusive rock waste material, which likely represents the wall rocks of the vein system. Numerous fragments of vein material disclosed argentite, freiburgite, chalcopyrite, pyrite, barite and calcite in a brecciated quartz vein host. The presence of these mineralized examples in the dump suggests that mine production concentrated on high grades, similar to the early mining at Dios Padre.

At the La Prieta Zone Company personnel have identified a 700 meter long narrow shear zone, approximately 0.5 to 1.2 meters in width that hosted the old La Prieta polymetallic mine (copper, lead, zinc, gold, and silver). Significant gold and silver values from recent sampling at this zone include the following:

Sample #	Gold (gpt)	Silver (gpt)	Copper (%)	Lead (%)	Zinc (%)
<b>170834</b>	<b>2.39</b>	<b>352</b>	0.07%	0.13%	0.02%
<b>170591</b>	1.35	<b>236</b>	0.01%	0.05%	0.03%
<b>170804</b>	0.02	185	0.03%	0.14%	0.03%
<b>170714</b>	<b>2.12</b>	184	0.01%	0.12%	0.01%
<b>170849</b>	<b>4.03</b>	148	0.06%	0.06%	0.05%
<b>170546</b>	<b>2.98</b>	143	0.21%	0.15%	0.20%
<b>170577</b>	<b>2.94</b>	134	0.18%	0.14%	0.07%
<b>170860</b>	1.42	104	0.17%	0.11%	0.35%
<b>170594</b>	1.97	73	0.06%	0.13%	0.17%
<b>170858</b>	<b>2.03</b>	52	0.00%	0.60%	0.41%
<b>170707</b>	<b>3.03</b>	49	0.01%	0.08%	0.03%
<b>170712</b>	<b>9.42</b>	29	0.01%	0.04%	0.00%

Testing and trenching along this zone indicates that high values of silver and gold occur along much of its length. Of the 41 samples taken along the strike of the shear, 31 samples (76%) exceeded the assigned background silver value of 5 grams per tonne. Anomalous assays along the length of the zone range from trace to a high value of 352 grams per tonne silver and from trace to a high value of 9.4 grams per tonne gold. Of note is the fact that most of the higher grade silver samples also returned significant gold values.

A second shear zone has been identified from aerial photographs which trends northwest and which intercepts the La Prieta shear at the point where the highest gold sample (9.42 gram per tonne) was obtained. Most of this structure is under the cover of overburden and will require considerable trenching to expose and properly evaluate its mineral potential. Significant values obtained from scattered and sparse outcrops are encouraging and are detailed in the following table:

Sample #	Gold (gpt)	Silver (gpt)	Copper (%)	Lead (%)	Zinc (%)
170750	0.01	83	0.00%	0.04%	0.01%
170746	0.01	75	0.00%	0.05%	0.01%
170759	0.52	75	0.00%	0.02%	0.01%
170749	0.02	70	0.00%	0.02%	0.01%
170782	2.34	39	0.11%	0.05%	0.18%

At least two other anomalous zones have been identified approximately 500 meters south of and parallel to the northwest trending mineralized zone. The area between these zones is covered by dense foliage and overburden. These two newly discovered zones occur in rock types similar to the other shear zones. Significant samples taken from available outcrops include the following:

Sample #	Gold (gpt)	Silver (gpt)	Copper (%)	Lead (%)	Zinc (%)
170770 (Zone A)	3.73	233	0.00%	0.04%	0.01%
170795 (Zone B)	0.60	80	0.01%	0.03%	0.01%
170796 (Zone B)	0.25	56	0.21%	0.60%	0.41%

### Los Tajos Zone

The current extent of the Los Tajos Zone as defined by geochemical sampling is 200 meters by 200 meters. The recent sampling program completed at Los Tajos was comprised of continuous chip sampling taken from 12 hand dug trenches each 2 meters in length, 1 meter wide and 1 meter deep into bedrock. These trenches were relatively broadly spaced and designed to provide a better understanding of the geology and mineralization in an area covered by dense vegetation and overburden.

The results of the trench sampling program are detailed in the following table.

LOS TAJOS ZONE – TRENCH RESULTS						
Trench Sample	Interval (meters)	Gold (ppm)	Silver (ppm)	Copper (ppm)	Lead (ppm)	Zinc (ppm)
170689	2.0	0.093	72.7	217	3,410	77
170690	2.0	0.020	69.7	151	3,800	61
170692	2.0	0.069	141.0	69	1,510	31
170695	2.0	0.767	76.4	80	3,330	70
170696	2.0	3,410	95.6	22	676	11
170697	2.0	0.023	40.5	56	850	19
170698	2.0	0.174	189.0	72	1,335	26
170699	2.0	0.237	107.0	38	1,150	19

### Chipahuiri Zone

At the Chipahuiri Zone, work focused on an area containing numerous mine workings in a zone of highly altered intrusive rocks. Six continuous rock chip channel samples on 2 meter intervals over a width of 14 meters each were taken in an altered diorite that intrudes a granodiorite mass. All six channel samples returned anomalous precious and base metal assay results of interest as detailed in the table below. Previous samples taken exposed bedrock in the wall of a creek bed 30 meters below the old mine adit yielded results ranging from 6.7 grams per tonne to 24 grams

per tonne silver, confirming the presence of anomalous mineralization. Recently acquired data combined with previous assay information suggests the mineralized zone measures approximately 30 meters by 40 meters.

<b>CHIPAHUIRI ZONE – CHANNEL RESULTS</b>						
<b>Channel Sample</b>	<b>Interval (meters)</b>	<b>Gold (ppm)</b>	<b>Silver (ppm)</b>	<b>Copper (ppm)</b>	<b>Lead (ppm)</b>	<b>Zinc (ppm)</b>
<b>170927</b>	14.0	0.284	<b>190.0</b>	3,080	15,850	3,900
<b>170928</b>	14.0	0.219	76.4	113	1,230	90
<b>170930</b>	14.0	0.113	75.2	360	1,640	1,015
<b>170933</b>	14.0	0.112	33.0	99	5,870	859
<b>325141</b>	14.0	0.011	24.3	394	1,025	3,340
<b>325167</b>	14.0	0.347	33.5	796	5,640	2,030

### **Geological Setting**

Both the Los Tajos and Chipahuri zones occur in altered diorite. All of the mineralization encountered to date is either disseminated or occurs in small veinlets of sulfides within the diorite. No structural controls have been identified based on the limited geology seen to date. The intrusive rocks in these zones are believed to be part of the lower volcanic sequence of the eastern Sierra Madre gold belt which hosts a number of precious metals deposits, including two multi-million ounce gold deposits which occur approximately 50 kilometers north of the Huerigo area; Mulatos Mine (Alamos Gold) and La India Mine (Agnico Eagle). The diorite occurs along a 5 kilometer long northwest trend that cuts across the Huerigo area. Geochemical sampling results have identified anomalous silver, supported by multi-element anomalies, in several locations between Chipahuri to the northwest and Los Tajos to the southeast and across the axis of this formation. The anomalous mineralized zones strike perpendicular to the northwest trend for as much as one kilometer or more.

Close examination of samples from test pits and trenches at Los Tajos and Chipahuri suggests that mineralization identified to date is broadly disseminated. The association of potentially disseminated mineralization in altered intrusive rock suggests that one or more bulk-mineable mineral targets might be developed. Accordingly the Company will focus its exploration efforts in the Huerigo area with more test pits and trenching in selective areas to define potential mineralized zones and to delineate drill targets.

### **Other Anomalous Zones**

Results from the 2012 geochemical sampling program carried out on the Oso Blanco II concession identified three other anomalous zones of interest. As with the Los Tajos and Chipahuri zones, these three other zones were defined by elevated silver-lead-copper assay values supported by anomalous multi-element assay values that exceed the statistical background populations. These zones represent priority exploration targets for the Company.

NSX Silver management and exploration personnel are highly encouraged by the discovery of potentially significant mineral targets at these zones and associated subsidiary zones. The association of strong silver and gold anomalies in previously mined and newly found zones peripheral to an altered quartz monzonite intrusive is considered to be a very exciting development. Subject to financing, the Company intends to continue the systematic exploration of its sizeable land position.

### **Qualified Person**

John E. Hiner, Licensed Geologist and Registered Member of SME, a qualified person as defined by National Instrument 43-101, has reviewed and approved the information provided in this Management and Analysis for the year ended December 31, 2013.

### **Selected Financial Information**

NSX Silver's consolidated net loss for the year ended December 31, 2013 was \$4,933,560 or \$0.11 per share as compared to \$517,274 or \$0.014 per share in 2012. In early September 2013, the Company informed the Dios Padre property owner that it was terminating its option agreement on the property. As a result, the Company recorded a write-down of its Dios Padre resource property in the amount of \$4.6 million or \$0.10 per share.

The following table contains selected financial information for the years ended December 31, 2013 and 2012:

	Year Ended Dec 31, 2013 \$	Year Ended Dec 31, 2012 \$
<b>Operating expenses</b>		
Consulting fees	85,636	104,263
Insurance	22,585	14,922

During the second quarter of 2013, management of NSX Silver completed a comprehensive review of its operating budget and enacted a number of measures to reduce costs including the implementation of a 40% reduction in contract administration and geological services. The only compensation received by Mr. Van Hoof, President and CEO of the Company, continues to be an annual salary of \$1.

In the first quarter of 2012, the Company completed its corporate restructuring to acquire NSGold's interest in the Dios Padre project and the Company's Mexican activities commenced in the first quarter of 2012. The first quarter results include three months of corporate activity and approximately one month of Mexican administrative activities. The following quarters include three months for each of the corporate and Mexican activities.

In the second quarter of 2013 the professional fees include legal fees of \$6,750 and legal disbursements, including annual filing fees, of 5,300. The second quarter of 2012 includes professional fees of \$15,251 and travel costs of \$9,094, most of which relates to the annual meeting, filing costs and some Mexican travel. In the final quarters of 2013 and 2012 the professional fees include the costs of the annual audits. The Company also incurred TSX V listing fees of \$5,200 for each year.

In the second quarter of 2013, the Company issued 1,220,000 stock options recording total stock based compensation of \$49,000 of which \$11,000 was capitalized to resource properties and \$38,000 was expensed. In the first quarter of 2012, the Company issued 1,390,000 stock options which are recorded in the accounts at fair value as estimated using the Black-Scholes pricing model. This valuation resulted in total stock-based compensation of \$261,000 of which \$71,000 was capitalized to resource properties and \$190,000 was expensed.

In the first quarter of 2013 the Company engaged Vantage Communications Ltd. and Dig Media Inc. to assist the Company with investor communications. These amounts were prepaid and the balance of Vantage Communication service expensed in the third quarter of 2013. In 2013, the Company expensed \$3,000 per quarter with Dig Media. The Company also engaged an investor communication service in June of 2012 incurring one month's service in the second quarter and three month's service in the final two quarters of 2012. Commencing in the fourth quarter of 2012 the Company has also retained Venture Liquidity Providers to initiate market making services to provide an orderly trading market for the common shares of the Company. This service has continued until the end of the first quarter in 2013.

During the last two quarters of 2013, the Company evaluated a number of different opportunities incurring property investigation expenses of \$22,112 (final quarter 2012 - \$3,369). NSX Silver personnel continue to evaluate acquisition opportunities within Sonora State and elsewhere in Mexico.

In the first quarter of 2013, the Company recorded a foreign currency gain of \$18,000 which relates to the outstanding Mexican value added tax. With the strengthening of the Mexican peso during the quarter the Company experienced a gain on the conversion to Canadian dollars. During the second and third quarters of 2013, the Mexican peso weakened causing the Company to record a foreign exchange loss of \$10,000 and \$1,000 respectively. A strengthening Mexican Peso in the fourth quarter of 2013 resulted in a small gain of \$2,390 resulting in a total gain of \$9,390 for 2013 compared to a loss of \$4,992 in 2012.

### Liquidity and Capital Resources

As at December 31, 2013, the Company had net working capital of \$123,795. The following table contains selected financial information as at December 31, 2013 and 2012 is summarized as follows:

	As at December 31, 2013 \$	As at December 31, 2012 \$
Total current assets	231,086	1,698,221
Resource properties and capital assets	291,025	3,666,844
Total assets	548,426	5,401,960
Total liabilities	107,291	87,515
Shareholder equity	441,135	5,314,445

The Company finances its operations through the issuance of equity securities. The Company is dependent on raising additional funding through the issuance of equity securities in order to fund future exploration programs and to meet its ongoing general and administrative requirements and while management has been successful in obtaining funding in the past, there can be no assurance that it will be able to do so in the future.

### Off-Balance Sheet Arrangements

The Company has no off-balance sheet arrangements.

### Related Party Transactions

During the year ended December 31, 2013, the Company incurred legal fees aggregating \$8,126 (2012 - \$79,872) from a law firm of which one of the officers is a partner. In 2012, the Company recorded \$72,439 to deferred share issue costs and \$7,432 to professional fee expense.

In the first quarter of 2012, the Company transacted with NSGold, the Company's former parent company, to distribute common shares of the Company by way of dividend to the shareholders of NS Gold. The Company also acquired the shares of CMOB from NSGold. As part of the transaction the rights and obligations of the Dios Padre Option Agreement were also assigned to the Company.

### **Outstanding Share Data**

As at December 31, 2011, the Company had only its initial share capital of 1,000 common shares issued and outstanding. In March of 2012, the Company issued 1,000,000 common shares on its acquisition of CMOB from NSGold and also issued 44,428,571 common shares to NSGold for gross subscription proceeds of \$4,665,000 million. The shares were distributed to the NSGold shareholders whereby the shareholders received one share of NSX Silver for each share of NSGold held at the record date of March 16, 2012. In each of June 2012 and June 2013, the Company issued 250,000 common shares associated with its Dios Padre Property option agreement. As at December 31, 2013 and April 29, 2014, the Company has 45,929,571 shares issued and outstanding.

In March 2012, the Company granted 990,000 options to three directors and officers and 400,000 options to employees and consultants. These stock options have an exercise price of \$0.25 per share and an expiry date in March 2022. During the year ended December 31, 2013, the Board of Directors approved an increase, in the maximum number of shares that can be issued under the stock option plan, from 3 million to 4 million. In June 2013, the Company granted 750,000 options to three directors and 470,000 options to employees and consultants. These options have an exercise price of \$0.10 and an expiry date in June 2023. As at December 31, 2013 and April 29, 2014 the Company had 2,610,000 options outstanding with a weighted average exercise price of \$0.18, which represents 6% of the issued and outstanding common shares.

### **Accounting Standards issued but not yet applied**

The Company does not expect to early adopt the following revised standards and amendments. Accordingly, the Company expects to adopt these standards as set forth below.

#### **i) IFRIC 21, Levies**

In May 2013, the IASB issued IFRIC 21, "Levies", an interpretation on the accounting for levies imposed by governments. IFRIC 21 is an interpretation of IAS 37, "Provisions, contingent liabilities and contingent assets". IAS 37 sets out criteria for the recognition of a liability, one of which is the requirement for the entity to have a present obligation as a result of a past event (known as an obligating event). The interpretation clarifies that the obligating event that gives rise to a liability to pay a levy is the activity described in the relevant legislation that triggers the payment of the levy. IFRIC 21 is effective for annual periods beginning on or after January 1, 2014. The Corporation is currently assessing the impact of adopting IFRIC 21.

#### **ii) IFRS 9, Financial Instruments**

IFRS 9, "Financial instruments" introduces new requirements for the classification and measurement of financial assets. IFRS 9 requires all recognized financial assets that are within the scope of IAS 39 Financial Instruments: Recognition and Measurement to be measured at amortized cost or fair value in subsequent accounting periods following initial recognition. Specifically, financial assets that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal outstanding are generally measured at amortized cost at the end of subsequent accounting periods. All other financial assets including equity investments are measured at their fair values at the end of subsequent accounting periods.

Requirements for classification and measurement of financial liabilities were added in October 2010 and they largely carried forward existing requirements in IAS 39, Financial Instruments – Recognition and Measurement, except that fair value changes due to credit risk for liabilities designated at fair value through profit and loss would generally be recorded in other comprehensive income.

IFRS 9 was amended in November 2013 to (i) include guidance on hedge accounting, (ii) allow entities to early adopt the requirement to recognize changes in fair value attributable to changes in an entity's own credit risk, from financial liabilities designated under the fair value option, in OCI, without having to adopt the remainder of IFRS 9,

and (iii) remove the previous mandatory effective date for adoption of January 1, 2015, although the standard is available for early adoption.

### **iii) IAS 32, Offsetting Financial Assets and Financial Liabilities**

IAS 32, Offsetting Financial Assets and Financial Liabilities, was issued in December 2011 and amends the criterion for an entity being allowed to report financial assets and liabilities on a net basis.

Retrospective application of this standard is effective for fiscal years beginning on or after January 1, 2014, with early adoption permitted. The Company has not elected for early adoption of this standard and does not expect there to be any financial impact upon adoption.

### **Risks and Uncertainties**

The following are certain factors relating to the business of the Company. These risks and uncertainties are not the only ones facing the Company. Additional risks and uncertainties not currently known to the Company, or that the Company currently deems immaterial, may also impair the operations of the Company. If any such risks actually occur, the financial condition, liquidity and results of operations of the Company could be materially adversely affected and the ability of the Company to implement its growth plans could be adversely affected.

The following is a description of certain risks and uncertainties that may affect the business of the Company.

#### **i. Limited Operating History**

The Company is a relatively new company with limited operating history and no history of business or mining operations, revenue generation or production history. The Company was incorporated August 9, 2011 and has yet to generate a profit from its activities. The Company will be subject to all of the business risks and uncertainties associated with any new business enterprise, including the risk that it will not achieve its growth objective. The Company anticipates that it may take several years to achieve positive cash flow from operations.

#### **ii. Exploration, Development and Operating Risks**

The exploration for and development of minerals involves significant risks, which even a combination of careful evaluation, experience and knowledge may not eliminate. Few properties which are explored are ultimately developed into producing mines. There can be no guarantee that the estimates of quantities and qualities of minerals disclosed will be economically recoverable. With all mining operations there is uncertainty and, therefore, risk associated with operating parameters and costs resulting from the scaling up of extraction methods tested in pilot conditions. Mineral exploration is speculative in nature and there can be no assurance that any minerals discovered will result in an increase in the Company's resource base.

The Company's operations are subject to all of the hazards and risks normally encountered in the exploration, development and production of minerals. These include unusual and unexpected geological formations, rock falls, seismic activity, flooding and other conditions involved in the extraction of material, any of which could result in damage to, or destruction of, mines and other producing facilities, damage to life or property, environmental damage and possible legal liability. Although precautions to minimize risk will be taken, operations are subject to hazards that may result in environmental pollution and consequent liability that could have a material adverse impact on the business, operations and financial performance of the Company.

#### **iii. Substantial Capital Requirements and Liquidity**

Substantial additional funds for the establishment of the Company's current and planned mining operations will be required. No assurances can be given that the Company will be able to raise the additional funding that may be required for such activities, should such funding not be fully generated from operations. Mineral prices, environmental rehabilitation or restitution, revenues, taxes, transportation costs, capital expenditures, operating expenses and geological results are all factors which will have an impact on the amount of additional capital that may be required. To meet such funding requirements, the Company may be required to undertake additional equity financing, which would be dilutive to shareholders. Debt financing, if available, may also involve restrictions on financing and operating activities. There is no assurance that additional financing will be available on terms

acceptable to the Company or at all. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations or anticipated expansion.

**iv. Fluctuating Mineral Prices**

The economics of mineral exploration is affected by many factors beyond the Company's control, including commodity prices, the cost of operations, variations in the grade of minerals explored and fluctuations in the market price of minerals. Depending on the price of minerals, it may be determined that it is impractical to continue the mineral exploration operation.

Mineral prices are prone to fluctuations and the marketability of minerals is affected by government regulation relating to price, royalties, allowable production and the importing and exporting of minerals, the effect of which cannot be accurately predicted. There is no assurance that a profitable market will exist for the sale of any minerals found on the Company's properties.

**v. Regulatory Requirements**

The current or future operations of the Company require permits from various governmental authorities, and such operations are and will be governed by laws and regulations governing exploration, development, production, taxes, labour standards, occupational health, waste disposal, toxic substances, land use, environmental protection, site safety and other matters. Companies engaged in the exploration and development of mineral properties generally experience increased costs and delays in development and other schedules as a result of the need to comply with applicable laws, regulations and permits. There can be no assurance that all permits which the Company may require for the facilities and conduct of exploration and development operations will be obtainable on reasonable terms or that such laws and regulation would not have an adverse effect on any exploration and development project which the Company might undertake.

Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment or remedial actions. Parties engaged in exploration and development operations may be required to compensate those suffering loss or damage by reason of the exploration and development activities and may have civil or criminal fines or penalties imposed upon them for violation of applicable laws or regulations. Amendments to current laws, regulation and permits governing operations and activities of mineral companies, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in capital expenditures or exploration and development costs or require abandonment or delays in the development of new properties.

**vi. Financing Risks and Dilution to Shareholders**

The Company has limited financial resources, no operations and no revenues. If the Company's exploration program on its exploration properties is successful, additional funds will be required for the purposes of further exploration and development. There can be no assurance that the Company will be able to obtain adequate financing in the future or that such financing will be available on favourable terms or at all. It is likely such additional capital will be raised through the issuance of additional equity, which will result in dilution to the Company's shareholders.

**vii. Title to Properties**

Acquisition of title to mineral properties is a very detailed and time-consuming process. Title to, and the area of, mineral properties may be disputed. The Company cannot give an assurance that title to its exploration properties will not be challenged or impugned. Mineral properties sometimes contain claims or transfer histories that examiners cannot verify. A successful claim that NSX Silver does not have title to its exploration properties could cause the Company to lose any rights to explore, develop and mine any minerals on that property, without compensation for its prior expenditures relating to such property.

### **viii. Requirement for Permits and Licenses**

A substantial number of permits and licenses may be required should the Company proceed beyond exploration; such licenses and permits may be difficult to obtain and may be subject to changes in regulations and in various operational circumstances. It is uncertain whether the Company will be able to obtain all such licenses and permits.

### **ix. Competition**

There is competition within the mining industry for the discovery and acquisition of properties considered to have commercial potential. The Company competes with other mining companies, many of which have greater financial, technical and other resources than the Company, for, among other things, the acquisition of minerals claims, leases and other mineral interests as well as for the recruitment and retention of qualified employees and other personnel.

### **x. Reliance on Management and Dependence on Key Personnel**

The success of the Company will be largely dependent upon on the performance of its directors and officers and the ability to attract and retain key personnel. The loss of the services of these persons may have a material adverse effect on the Company's business and prospects. The Company will compete with numerous other companies for the recruitment and retention of qualified employees and contractors. There is no assurance that the Company can maintain the service of its directors and officers or other qualified personnel required to operate its business. Failure to do so could have a material adverse effect on the Company and its prospects.

### **xi. No Mineral Reserves**

Mineral reserves are, in the large part, estimates and no assurance can be given that the anticipated tonnages and grades will be achieved or that the indicated level of recovery will be realized. Reserve estimates for properties that have not yet commenced production may require revision based on actual production experience. Market price fluctuations of metals, as well as increased production costs or reduced recovery rates, may render mineral reserves containing relatively lower grades of mineralization uneconomic and may ultimately result in a restatement of reserves. Moreover, short-term operating factors relating to the mineral reserves, such as the need for orderly development of the ore bodies and the processing of new or different mineral grades, may cause a mining operation to be unprofitable in any particular accounting period.

### **xii. Environmental Risks**

The Company's exploration and appraisal programs will, in general, be subject to approval by regulatory bodies. Additionally, all phases of the mining business present environmental risks and hazards and are subject to environmental regulation pursuant to a variety of international conventions and federal, provincial and municipal laws and regulations. Environmental legislation provides for, among other things, restrictions and prohibitions on spills, releases or emissions of various substances produced in association with mining operations. The legislation also requires that wells and facility sites be operated, maintained, abandoned and reclaimed to the satisfaction of applicable regulatory authorities. Compliance with such legislation can require significant expenditures and a breach may result in the imposition of fines and penalties, some of which may be material. Environmental legislation is evolving in a manner expected to result in stricter standards and enforcement, larger fines and liability and potentially increased capital expenditures and operating costs.

### **xiii. Governmental Regulations and Processing Licenses and Permits**

The activities of the Company are subject to Mexican approvals, various laws governing prospecting, development, land resumptions, production taxes, labour standards and occupational health, mine safety, toxic substances and other matters. Although the Company believes that its activities are currently carried out in accordance with all applicable rules and regulations, no assurance can be given that new rules and regulations will not be enacted or that existing rules and regulations will not be applied in a manner which could limit or curtail production or development. Amendments to current laws and regulations governing operations and activities of exploration and mining, or more stringent implementation thereof, could have a material adverse impact on the business, operations and financial performance of the Company. Further, the mining licenses and permits issued in respect of its projects may be subject to conditions which, if not satisfied, may lead to the revocation of such licenses. In the event of revocation, the value of the Company's investments in such projects may decline.

#### **xiv. Local Resident Concerns**

Apart from ordinary environmental issues, work on, or the development and mining of the Oso Blanco property could be subject to resistance from local residents that could either prevent or delay exploration and development of the property.

#### **xv. Management Inexperience in Developing Mines**

The management of the Company has some experience in exploring for minerals, but may lack all or some of the necessary technical training and experience to successfully develop and operate a mine. Without adequate training or experience in these areas, management may not be fully aware of many of the specific requirements related to working within the mining industry and their decisions and choices may not take into account all available and necessary engineering or managerial approaches that experienced mine operating companies commonly use to successfully develop a mine. Consequently, the Company's operations, earnings and ultimate financial success could be materially adversely effected.

#### **xvi. Conflicts of Interest**

Certain of the directors and officers of the Company are engaged in, and will continue to engage in, other business activities on their own behalf and on behalf of other companies (including mineral resource companies) and, as a result of these and other activities, such directors and officers of the Company may become subject to conflicts of interest. The Canada Business Corporations Act (CBCA) provides that in the event that a director has a material interest in a contract or proposed contract or agreement that is material to the Company, the director must disclose his interest in such contract or agreement and refrain from voting on any matter in respect of such contract or agreement, subject to and in accordance with the CBCA. To the extent that conflicts of interest arise, such conflicts will be resolved in accordance with the provisions of the CBCA.

#### **xvii. Uninsurable Risks**

Exploration, development and production operations on mineral properties involve numerous risks, including unexpected or unusual geological operating conditions, rock bursts, cave-ins, fires, floods, earthquakes and other environmental occurrences. It is not always possible to obtain insurance against all such risks and the Company may decide not to insure against certain risks as a result of high premiums or other reasons. Should such liabilities arise, they could have an adverse impact on the Company's results of operations and financial condition and could cause a decline in the value of the Company's shares. The Company does not intend to maintain insurance against environmental risks.

#### **xviii. Litigation**

The Company and/or its directors may be subject to a variety of civil or other legal proceedings, with or without merit.

#### **xix. Dividends**

To date, NSX Silver has not paid any dividends on its outstanding shares. Any decision to pay dividends on the shares of the Company will be made by its board of directors on the basis of the Company's earnings, financial requirements and other conditions.

Additional information regarding the Company is available on SEDAR at [www.sedar.com](http://www.sedar.com).

## **Management's Report**

The accompanying consolidated financial statements of **NSX Silver Inc.** are the responsibility of management and have been approved by the Board of Directors. The consolidated financial statements have been prepared by management in accordance with International Financial Reporting Standards ("IFRS"). The consolidated financial statements include certain amounts and assumptions that are based on management's best estimates and have been derived with careful judgment.

In fulfilling its responsibilities, management has developed and maintains a system of internal accounting controls. These controls are designed to provide reasonable assurance that the financial records are reliable for preparation of the financial statements. The Audit Committee of the Board of Directors reviewed and approved the Company's consolidated financial statements, and recommended their approval by the Board of Directors.

PricewaterhouseCoopers LLP, appointed as the Company's auditors by the shareholders, have examined these consolidated financial statements and their report follows.

## **Independent Auditor's Report**

### **To the Shareholders of NSX Silver Inc.**

We have audited the accompanying consolidated financial statements of **NSX Silver Inc.** and its subsidiaries, which comprise the consolidated statements of financial position as at December 31, 2013 and December 31, 2012 and the consolidated statements of changes in equity, loss and comprehensive loss and cash flows for the years then ended and the related notes, which comprise a summary of significant accounting policies and other explanatory information.

### **Management's responsibility for the consolidated financial statements**

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

### **Auditor's responsibility**

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

### **Opinion**

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of NSX Silver Inc. and its subsidiaries, as at December 31, 2013 and December 31, 2012 and their financial performance and their cash flows for the years then ended in accordance with International Financial Reporting Standards.

### **Emphasis of matter**

Without qualifying our opinion, we draw attention to note 1 of the consolidated financial statements which describes matters and conditions that indicate the existence of material uncertainties that may cast significant doubt about NSX Silver Inc.'s ability to continue as a going concern.

The accompanying notes are an integral part of these consolidated financial statements.

# **NSX Silver Inc.**

## **Notes to Consolidated Financial Statements**

**For the years ended December 31, 2013 and December 31, 2012**

---

(expressed in Canadian dollars)

### **1 Nature of operations and going concern**

#### **Nature of operations**

NSX Silver Inc. (the "Company") was incorporated under the Canada Business Corporations Act on August 9, 2011 as a wholly owned subsidiary of NSGold Corporation ("NSGold"). The common shares of the Company commenced trading on the TSX-Venture Exchange, on March 14, 2012, with the symbol NSY (see note 4). Its principal business activities will be the acquisition, exploration and development of resource properties in Mexico. The Company's registered office is located at 1550 Bedford Highway in Halifax, Nova Scotia.

#### **Going concern**

The Corporation's planned principal operations have not commenced, and no revenues have been derived during the period ended December 31, 2013. These consolidated financial statements as at December 31, 2013 and December 31, 2012 have been prepared on the basis of International Financial Reporting Standards ("IFRS") applicable to a going concern, which contemplates the realization of assets and the settlement of liabilities and commitments in the normal course of business. There are material uncertainties that may cast significant doubt about the appropriateness of the going concern assumption as the Company has an accumulated deficit of \$5.5 million (2012 – \$0.5 million) and has no operations at this time which will generate revenue. In addition to its working capital requirements, the Company must secure sufficient funding to maintain legal title to its resource properties, to fund its exploration and development activities and to fund its general and administrative costs. Accordingly, the Company will need to raise additional financing. Management cannot provide assurance that the Company will ultimately achieve profitable operations, become cash flow positive, or raise additional debt and/or equity capital. These financial statements do not include any adjustments related to the recoverability and classification of assets or the amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern, and these adjustments could be material.

### **2 Basis of presentation**

These consolidated financial statements have been prepared in accordance with IFRS as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of financial statements in accordance with Part I of the Canadian Institute of Chartered Accountants ("CICA") handbook.

The Board of Directors approved the statements for issue on April 30, 2014.

#### **Basis of measurement**

These consolidated financial statements have been prepared under the historical cost basis.

# NSX Silver Inc.

## Notes to Consolidated Financial Statements

For the years ended December 31, 2013 and December 31, 2012

---

(expressed in Canadian dollars)

### 2 Basis of presentation (continued)

#### Use of estimates and judgments

The preparation of the financial statements requires the Company's management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. The determination of estimates requires the exercise of judgment based on various assumptions and other factors such as historical experience and current as well as expected economic conditions. Actual results may differ from these estimates.

#### *Recoverability of resource properties*

The Company assesses all resource properties at each reporting period date to determine whether any indication of impairment exists. Where an indicator of impairment exists, a formal estimate of the recoverable amount is made, which is considered to be the higher of the fair value less costs to sell and value in use. These assessments require the use of estimates and assumptions such as long-term commodity prices, future capital requirements, exploration potential and operating performance.

#### *Fair value of assets acquired from NSGold (note 4)*

The estimation of the fair value of assets acquired is determined based on the fair value of the assets received from NSGold in return for shares of the Company. The determination of the fair value requires the exercise of judgment based on various assumptions and other factors such as historical experience and current as well as expected economic conditions. In order to estimate the fair value of the assets transferred to the Company, management looked to various factors including the share prices of the Company and NSGold before and after the transaction and the inferred and in situ values of the properties transferred. A \$0.01 difference in the per share value allocated to the Company's shares, issued to NSGold, would impact the fair value of the assets acquired by approximately \$500,000.

### 3 Significant accounting policies

The significant accounting policies used in the preparation of these consolidated financial statements are as follows:

#### Cash and cash equivalents

Cash and cash equivalents include cash on hand, balances with banks, and highly liquid temporary investments that are readily convertible to known amounts of cash.

#### Deferred share issuance costs

Costs directly attributable to the raising of capital will be charged against the related share capital. Costs related to shares not yet issued are recorded as deferred share issuance costs. These costs will be deferred until the issuance of the shares to which the costs relate, at which time the costs will be charged against the related share capital or charged to operations if the shares are not issued.

# **NSX Silver Inc.**

## **Notes to Consolidated Financial Statements**

**For the years ended December 31, 2013 and December 31, 2012**

---

(expressed in Canadian dollars)

### **3 Significant accounting policies** (continued)

#### **Financial instruments**

Financial instruments are classified as follows:

Cash and cash equivalents is classified as “Loans and Receivables”. After its initial fair value measurement, it is measured at amortized cost using the effective interest method, less a provision for impairment.

Accounts payable and accrued liabilities and amounts due to NSGold are classified as “Other Financial Liabilities”. Other Financial Liabilities are initially recognized at fair value less transaction costs. Subsequent to initial recognition, Other Financial Liabilities are measured at amortized cost using the effective interest method.

#### **Impairment of financial assets**

At each reporting date, the Company assesses whether there is objective evidence that a financial asset is impaired. If such evidence exists, the Company recognizes an impairment loss.

Financial assets carried at amortized cost: the loss is the difference between the amortized cost of the loan or receivable and the present value of the estimated future cash flows, discounted using the instrument’s original effective interest rate. The carrying amount of the asset is reduced by this amount either directly or indirectly through the use of an allowance account.

#### **Consolidation**

The financial statements of the Company consolidate the accounts of the Company and its subsidiary Compañía Minera Oso Blanco (“CMOB”). All intercompany transactions, balances and unrealized gains and losses from intercompany transactions are eliminated on consolidation. There are no non-controlling interests, therefore, all loss and comprehensive loss is attributable to the shareholders of the Company.

#### **Capital management**

The Company’s capital structure consists of share capital, deficit and contributed surplus, which at December 31, 2013 totalled \$441,135 (2012 - \$5,314,445). The Company’s objective when managing capital is to maintain adequate levels of funding to support the acquisition and exploration of resource properties and maintain the necessary corporate and administrative functions to facilitate these activities. This is done primarily through equity financing. Future financings are dependent on market conditions and there can be no assurance the Company will be able to raise funds in the future.

The Company invests all capital that is surplus to its immediate operational needs in short-term, highly-liquid, high-grade financial instruments. There were no changes to the Company’s approach to capital management during the year. The Company is not subject to externally imposed capital requirements.

# **NSX Silver Inc.**

## **Notes to Consolidated Financial Statements**

**For the years ended December 31, 2013 and December 31, 2012**

---

(expressed in Canadian dollars)

### **3 Significant accounting policies** (continued)

#### **Functional and presentation currency and foreign currency translation**

Items included in these consolidated financial statements are measured using the currency of the primary economic environment in which the entity operates and these consolidated financial statements are presented in Canadian dollars. The functional currency of all subsidiaries and the parent company are Canadian dollars. Foreign currency transactions are recorded at the foreign exchange rate in effect on the date of the transaction and gains and losses resulting from the settlement of such transactions are recorded in the consolidated statement of loss and comprehensive loss.

#### **Stock-based compensation**

The Company accounts for stock options using the fair value method. The estimated fair value of all stock options granted is recorded in the consolidated statement of loss and comprehensive loss over their vesting periods.

The Company grants stock options to certain officers and directors. Stock options vest in accordance with the individual option granting contracts and expire after ten years. Each tranche in an award is considered a separate award with its own vesting period and grant date fair value. Fair value of each tranche is measured at the date of grant using Black-Scholes option pricing model. Compensation expense is recognized over the tranche's vesting period by increasing contributed surplus based on the number of awards expected to vest. The number of awards expected to vest is reviewed at least annually, with any impact being recognized immediately. Consideration paid by the directors and officers upon exercise of the stock options and the amount previously recognized in contributed surplus are recorded as share capital.

#### **Income taxes**

The Company uses the asset and liability method for accounting for income taxes.

Current tax assets and liabilities for the current and prior periods are measured at the amounts expected to be paid or recovered, using tax rates and laws that have been enacted or substantively enacted by the end of the period.

Deferred tax assets and liabilities are recognized for all future tax consequences attributable to the differences between the financial statement carrying amounts of assets and liabilities and their respective tax bases, except for the initial recognition of goodwill and the initial recognition of an asset or liability, which at the time of the transaction, affects neither accounting profit nor taxable profit or loss. Deferred tax assets are also recognized for unused tax losses and unused tax credits. Deferred tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences, unused tax losses and other unused deductible amounts can be utilized. Deferred tax assets and liabilities are measured using enacted or substantively enacted tax rates and tax laws expected to apply when the carrying amount of the assets or liabilities are recovered or settled or the unused losses are expected to be utilized.

Current and deferred income tax expense is recognized in the consolidated statement of loss and comprehensive loss for the year, except to the extent that the income taxes related to a transaction or event which is recognized, in the same or different period, either in other comprehensive income or directly in equity.

# **NSX Silver Inc.**

## **Notes to Consolidated Financial Statements**

**For the years ended December 31, 2013 and December 31, 2012**

---

(expressed in Canadian dollars)

### **3 Significant accounting policies** (continued)

#### **Impairment of non-financial assets**

The carrying amounts of the Company's non-financial assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indications exist, the assets recoverable amount is estimated.

#### **Loss per share**

Loss per share is calculated based on the weighted average number of shares outstanding during the year. The Company follows the treasury method of calculating diluted earnings per share. This method assumes that any proceeds from the exercise of stock options and other dilutive instruments would be used to purchase common shares at the average market price during the year. Diluted loss per share for the period presented is the same as basic loss per share, as the Company has no dilutive instruments outstanding.

#### **Resource properties**

Initial acquisition costs and exploration and development costs related to resource properties are deferred until such time as the properties are put into commercial production, sold or abandoned or management determines that the resource properties are not economically viable, at which time the resource properties are written down to their recoverable amount. Under this method, all amounts shown as resource properties represent costs incurred to date less amounts amortized, received from exploration partners and/or written down, and do not necessarily represent present or future values.

If any properties are put into commercial production, the carrying values of the properties will be depleted following the unit of production method. If any properties are sold or abandoned, or considered to be impaired in value, the carrying value of the properties will be charged to operations.

The carrying values of resource properties, on a property-by-property basis, will be reviewed by management at least annually to determine if they have become impaired. If impairment is deemed to exist, the resource properties will be written down to their recoverable amount. The ultimate recoverability of the amounts capitalized for the resource properties is dependent upon obtaining the necessary financing to complete their development and realize profitable production or proceeds from the disposition thereof.

Management's estimate of recoverability of the Company's resource property has been based on current conditions. However, it is reasonably possible that changes could occur in the near term which could adversely affect management's estimates and may result in future write-downs of the resource property.

## Notes to Consolidated Financial Statements

For the years ended December 31, 2013 and December 31, 2012

---

(expressed in Canadian dollars)

### 3 Significant accounting policies (continued)

#### Accounting Standards issued but not yet applied

The Company does not expect to early adopt the following revised standards and amendments. Accordingly, the Company expects to adopt these standards as set forth below:

i) IFRIC 21, *Levies*

In May 2013, the IASB issued IFRIC 21, "Levies", an interpretation on the accounting for levies imposed by governments. IFRIC 21 is an interpretation of IAS 37, "Provisions, contingent liabilities and contingent assets". IAS 37 sets out criteria for the recognition of a liability, one of which is the requirement for the entity to have a present obligation as a result of a past event (known as an obligating event). The interpretation clarifies that the obligating event that gives rise to a liability to pay a levy is the activity described in the relevant legislation that triggers the payment of the levy. IFRIC 21 is effective for annual periods beginning on or after January 1, 2014. The Company is currently assessing the impact of adopting IFRIC 21.

ii) IFRS 9, *Financial Instruments*

IFRS 9, "Financial instruments" introduces new requirements for the classification and measurement of financial assets. IFRS 9 requires all recognized financial assets that are within the scope of IAS 39 Financial Instruments: Recognition and Measurement to be measured at amortized cost or fair value in subsequent accounting periods following initial recognition. Specifically, financial assets that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal outstanding are generally measured at amortized cost at the end of subsequent accounting periods. All other financial assets including equity investments are measured at their fair values at the end of subsequent accounting periods.

Requirements for classification and measurement of financial liabilities were added in October 2010 and they largely carried forward existing requirements in IAS 39, Financial Instruments – Recognition and Measurement, except that fair value changes due to credit risk for liabilities designated at fair value through profit and loss would generally be recorded in other comprehensive income.

IFRS 9 was amended in November 2013 to (i) include guidance on hedge accounting, (ii) allow entities to early adopt the requirement to recognize changes in fair value attributable to changes in an entity's own credit risk, from financial liabilities designated under the fair value option, in OCI, without having to adopt the remainder of IFRS 9, and (iii) remove the previous mandatory effective date for adoption of January 1, 2015, although the standard is available for early adoption.

iii) IAS 32, *Offsetting Financial Assets and Financial Liabilities*

IAS 32, *Offsetting Financial Assets and Financial Liabilities*, was issued in December 2011 and amends the criterion for an entity being allowed to report financial assets and liabilities on a net basis. Retrospective application of this standard is effective for fiscal years beginning on or after January 1, 2014, with early adoption permitted. The Company has not elected for early adoption of this standard and does not expect there to be any financial impact upon adoption.

### 4 Share subscription agreement with NSGold, acquisition of shares of CMOB and distribution of the Company's shares

On February 28, 2012, the Company filed a non-offering prospectus with the securities commissions of each of the provinces of Canada, relating to the qualification and distribution of common shares of the Company by NSGold (the former parent company) to its shareholders by way of distribution in kind. The shareholders of NSGold approved a special resolution reducing NSGold's paid-up capital in connection with the "spin-out" of the shares of the Company to the shareholders of NSGold at a special meeting of the shareholders held on December 22, 2011.

In association with this spin-out and prior to the subscription of common shares of the Company by NSGold, the Company completed the acquisition of the shares of CMOB, a wholly owned subsidiary of NSGold, for one million common shares of the Company. The acquisition has been recorded as a purchase of assets which has been recorded based on the fair value of the assets of CMOB. Also, in March 2012, the Company completed a share subscription agreement with NSGold whereby NSGold acquired 44,428,571 common shares of the Company for gross proceeds of \$4,665,000, net of share issue costs of \$243,601.

NSGold then completed the distribution of the common shares of the Company to the NSGold shareholders whereby the shareholders received one share of the Company for each share of NSGold held as of the record date of March 16, 2012. A total of 43,553,767 shares of the Company were distributed to the shareholders of NSGold with the distribution effected by way of a distribution of paid up capital of NSGold. After the distribution, NSGold holds 1,875,804 shares of the Company.

The common shares of the Company commenced trading on the TSX Venture Exchange on March 14, 2012 as a Tier 2 Mining Issuer under the trading symbol NSY.

The net assets of the Company and CMOB on the date of spin-out by NSGold are summarized as follows:

	\$
<b>Assets acquired</b>	
Cash and cash equivalents	4,560,137
Sales tax recoverable	37,862

#### Dios Padre Property Option Agreement

In connection with the purchase by the Company of the shares of CMOB, all of the rights and obligations of NSGold under a Property Option Agreement dated April 9, 2011 (see below) were assigned to the Company, so that the Company thereafter will issue shares and make cash payments to the optionor, as the case may be. The optionor has consented to such assignment.

Under the Property Option Agreement with Minera Pena Blanca S.A. de C.V. (“Minera Pena Blanca”), the Company, through its subsidiary CMOB, had the exclusive right to acquire a 100% undivided interest in three mining concessions in Mexico (Dios Padre, Don Carlos and Alejandro) from the optionor. Under the terms of an amended Property Option Agreement, the Company would acquire this 100% undivided interest by making cash payments totaling US\$6 million and issuing an aggregate of 1,250,000 common shares to the optionor in five equal annual tranches. As at December 31, 2013, cash payments of US\$500,000 (2012 - \$250,000) had been made and 750,000 (2012 – 500,000) shares were issued to the optionor. In order to acquire a 100% interest, the Company would have to issue the remaining 500,000 shares and make the balance of the cash payments in the amount of US\$5,500,000.

The Company was also required to pay the principal of Minera Pena Blanca an annual consulting fee of US\$125,000 for the three years ending May 2016 subject to the amending agreement remaining in effect. For the year ended December 31, 2013, the Company incurred \$45,890 in consulting fees with the principal of Minera Pena Blanca.

In September 2013, the Company informed the property owner that it was terminating its option agreement. As a result, the Company recorded a write-down of its Dios Padre resource property in the amount of \$4,563,788.

(expressed in Canadian dollars)

### 10 Share capital

#### a) Authorized capital stock

Unlimited number of common shares, without nominal or par value

Unlimited number of preferred shares, without nominal or par value, issuable in one or more series

	# of shares	Amount \$
<b>Common shares issued and fully paid</b>		
Shares issued for cash	1,000	100
<b>Balance – December 31, 2011</b>	1,000	100
Shares issued to NSGold (note 4)	45,428,571	5,526,399
Shares issued pursuant to resource property option agreement	250,000	62,500
<b>Balance – December 31, 2012</b>	45,679,571	5,588,999
Shares issued pursuant to resource property option agreement	250,000	11,250
<b>Balance – December 31, 2013</b>	45,929,571	5,600,249

b) As at December 31, 2013, there are 6,049,374 (2012 – 10,157,289) common shares subject to escrow agreements.

#### c) Options

The Company has adopted a stock option plan for directors, officers, employees and consultants of the Company. During the year ended December 31, 2013, the Board of Directors approved an increase, in the maximum number of shares that may be issued under the stock option plan, from 3 million to 4 million shares. The exercise price of the stock options is determined by the Board of Directors when the options are granted, but cannot be less than the closing price of the Company's shares on the TSX Venture Exchange on the business day immediately preceding the day on which the option is granted. The maximum exercise period of the stock options is ten years.

During the year ended December 31, 2012, the Company granted 1,390,000 stock options with an exercise price of \$0.25. These options vest immediately and expire in ten years. The fair value of these options was estimated using the Black-Scholes pricing model based on a volatility of 130%, risk-free rate of 2% and expected lives of 3 years with no dividend yield. This valuation resulted in total stock-based compensation for the year ended December 31, 2012 of \$261,000 of which \$71,000 was capitalized to mineral properties and \$190,000 was expensed.

During the year ended December 31, 2013, the Company granted 1,220,000 stock options with an exercise price of \$0.10. These options vest immediately and expire in ten years. The fair value of these options was estimated using the Black-Scholes pricing model based on a volatility of 160%, risk-free rate of 1.4% and expected lives of 5 years with no dividend yield. This valuation resulted in total stock-based compensation for the year ended December 31, 2013 of \$49,000 of which \$11,000 was capitalized to mineral properties and \$38,000 was expensed.

## Notes to Consolidated Financial Statements

For the years ended December 31, 2013 and December 31, 2012

---

(expressed in Canadian dollars)

### 11 Income taxes

At December 31, 2012, the Company's effective income tax rate differs from the amount that would be computed from applying the federal and provincial statutory rate of 31% to the pre-tax loss for the period. The reasons for the difference are as follows:

	2013 \$	2012 \$
Loss before income taxes	4,933,560	517,274
Income tax rate	31%	31%
Income tax recovery based on statutory rates	1,530,000	160,000
Non-deductible stock-based compensation	(12,000)	(59,000)
Unrecognized deferred tax assets	(1,518,000)	(101,000)
Provision for income taxes	—	—

#### Losses

The Company has Canadian non-capital tax losses of approximately \$489,000 available for carry-forward to reduce future years' taxable income. These non-capital tax losses expire as follows: \$226,000 in 2032 and \$263,000 in 2033. The Company also has, Mexican non-capital tax losses of approximately \$4,745,000 available for carry forward to reduce future years taxable income that expire as follows: \$120,000 in 2022 and \$4,625,000 in 2023. No deferred tax asset has been recognized for these losses as it is not probable that the related deferred tax asset will be realized.

### 12 Related party transactions

The Company acquired the shares of CMOB from its former parent company, NSGold. The Company also entered a share subscription agreement with NSGold and NSGold distributed these shares of the Company by way of dividend to the shareholders of NSGold during year ended December 31, 2012 (see note 4).

During the year ended December 31, 2013, the Company incurred legal fees aggregating \$8,126 (2012 - \$79,872) from a law firm of which one of the officers is a partner. In 2013, the Company recorded \$nil (2012 - \$72,439) to deferred share issue costs and \$8,126 (2012 - \$7,432) to professional fee expense.

### 13 Supplemental cash flow information

During the year ended December 31, 2013, the Company incurred expenditures on resource properties of \$31,000 (2012 - \$20,000) which were recorded as accounts payable at the end of the year. In 2013, the Company recorded the issuance of shares pursuant to resource property option payments in the amount of \$11,250 (2012 - \$62,500). In 2012, the Company also recorded the issuance of shares pursuant to the acquisition of a resource property in the amount of \$1,105,000. These items are non-cash transactions and have been excluded from the consolidated statements of cash flows.

## Notes to Consolidated Financial Statements

For the years ended December 31, 2013 and December 31, 2012

---

(expressed in Canadian dollars)

### 14 Financial instruments

#### Credit risk

The Company manages credit risk by holding its cash with high quality financial institutions in Canada, where management believes the risk of loss to be low.

#### Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions. The Company does not have sufficient working capital to carry out all budgeted programs in 2014 and must finance during 2014 to avoid disruption in planned expenditures (see note 1).

#### Market Risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices.

##### a) Interest rate risk

The Company has no interest-bearing debt and is not exposed to any significant interest rate risk.

##### b) Foreign currency risk

The Company operates in Mexico, giving rise to foreign currency risk. To limit the Company's exposure to this risk, cash is primarily held with high quality financial institutions in Canada. In the future, based on the timing of the Company's exploration programs, foreign currencies may be purchased in advance of expenditures to lock in favourable rates in line with the Company's budgets, otherwise the Company does not use any form of hedging against fluctuations in foreign exchange.

As at December 31, 2013, the Company held the following items in foreign currencies:

	December 31, 2013		December 31, 2012	
	USD	Pesos	USD	Pesos
Cash and cash equivalents	–	4,629	1,373	21,673
Sales tax recoverable	–	118,000	–	222,547
Deposits and prepaid expenses	–	2,030	–	19,587
Accounts payable and accrued liabilities	–	36,169	–	21,595

At December 31, 2013, sensitivity to a plus or minus 10% change in the Mexican Pesos exchange rate would affect net loss and comprehensive loss by approximately \$9,000.

#### Price risk

The Company is not exposed to any direct price risk other than that associated with commodities and how fluctuations impact companies in the mineral exploration and mining industries as the Company has no significant revenues.
