

NSX SILVER INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS FOR THE SIX MONTH PERIOD ENDED JUNE 30, 2016

Background

This Management's Discussion and Analysis (MD&A) of NSX Silver Inc. ("NSX Silver" or "the Company") is dated August 29, 2016 and should be read in conjunction with the unaudited interim financial statements and accompanying notes for the six month periods ended June 30, 2016 and June 30, 2015 which have been prepared in accordance with International Financial Reporting Standards (IFRS) for consolidated financial statements. This MD&A should also be read in conjunction with the audited annual financial statements and accompanying notes for the year ended December 31, 2015. All amounts are in Canadian dollars unless otherwise specified. The financial statements and additional information, including news releases and technical reports referenced herein, are available on the Canadian System for Electronic Document Analysis and Retrieval (SEDAR) at www.sedar.com under the Company's profile. The common shares of NSX Silver are traded on the NEX Board of the TSX Venture Exchange under the symbol "NSY.H".

Forward-Looking Information

Certain statements in this MD&A are forward-looking statements or information (collectively- forward-looking statements). NSX Silver is hereby providing cautionary statements identifying important factors that could cause the actual results to differ materially from those projected in the forward-looking statements. Any statements that express, or involve discussions as to, expectations, beliefs, plans, objectives, assumptions or future events or performance (often, but not always, through the use of words or phrases such as "may", "is expected to", "anticipates", "estimates", "intends", "plans", "projection", "could", "vision", "goals", "objective" and "outlook") are not historical facts and may be forward-looking and may involve estimates, assumptions and uncertainties which could cause actual results or outcomes to differ materially from those expressed in the forward-looking statements. In making these forward-looking statements, NSX Silver has assumed that the risks listed below will not adversely impact the business of NSX Silver.

By their nature, forward-looking statements involve numerous assumptions, inherent risks and uncertainties, both general and specific, which contribute to the possibility that the predicted outcomes may not occur or may be delayed. The risks, uncertainties and other factors, many of which are beyond the control of NSX Silver, that could influence actual results include, but are not limited to: limited operating history; exploration, development and operating risks; regulatory risks; substantial capital requirements and liquidity; financing risks and dilution to shareholders; competition; reliance on management and dependence on key personnel; fluctuating mineral prices and marketability of minerals; title to properties; local resident concerns; no mineral reserves or mineral resources; environmental risks; governmental regulations and processing licenses and permits; management inexperience in developing mines; conflicts of interest of management; uninsurable risks; exposure to potential litigation; dividends; and other factors beyond the control of NSX Silver.

Furthermore, any forward-looking statement speaks only as of the date on which such statement is made, and, except as required by applicable law, NSX Silver undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made or to reflect the occurrence of unanticipated events. New factors emerge from time to time, and it is not possible for management to predict all such factors and to assess in advance the impact of each such factor on the business of NSX Silver or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statement. Refer to the section titled "Risk and Uncertainties".

Company Overview

NSX Silver Inc. was incorporated on August 9, 2011 under the Canada Business Corporations Act as a wholly-owned subsidiary of NSGold Corporation ("NSGold").

NSGold, the former parent company of NSX Silver, is a mineral exploration company with gold and base metal properties located in Nova Scotia, Canada. In April 2011, NSGold signed an agreement whereby it secured the option to acquire a 100% ownership interest in the three mining concessions comprising the Dios Padre Property, including the historic Dios Padre Silver Mine, located in Sonora State, Mexico. In July 2011, NSGold announced that it commenced the process to separate its Nova Scotia gold and base metal assets and its Mexican silver assets into two separate public companies so that NSGold could devote itself solely to exploration for gold and other metals. NSX Silver was incorporated in August 2011 as a wholly-owned subsidiary of NSGold, with the intention of taking over NSGold's exploration properties in Mexico.

On August 5, 2011, NSGold completed a private placement of 8,627,451 common shares at a price of \$0.51 per share, for gross proceeds of \$4.4 million. Sprott Asset Management LP, acting on behalf of certain Sprott funds and managed accounts, subscribed for the 8,627,451 common shares issued in the private placement, representing 19.9% of the common shares of NSGold issued and outstanding after the placement. The net proceeds from this financing were allocated to funding the activities of NSX Silver and working capital.

On October 21, 2011, NSX Silver and NSGold, as promoter, filed a preliminary prospectus with the securities commissions of each of the provinces of Canada in connection with a distribution of NSX Silver common shares to the shareholders of NSGold. A special meeting of shareholders of NSGold was held on December 22, 2011, at which the shareholders approved a special resolution reducing NSGold's paid-up capital in connection with the "spin-out" of the shares of NSX Silver to the shareholders of NSGold. The reduction of NSGold's paid-up capital is intended to result in the distribution of the shares of NSX Silver being treated as non-taxable for most of NSGold's shareholders.

On March 1, 2012, NSX Silver obtained a receipt from the securities commissions of each of the provinces of Canada for a final prospectus dated February 28, 2012. The prospectus qualified shares of NSX Silver to be distributed by NSGold to its shareholders by way of distribution in kind.

In March 2012, NSX Silver completed the acquisition from NSGold of all of the shares of Compania Minera Oso Blanco SA de CV ("CMOB") for which NSGold received one million common shares of NSX Silver. Also in March 2012, NSGold completed a share subscription agreement whereby NSGold acquired 44,428,571 common shares of NSX Silver for gross proceeds of \$4,665,000. Upon closing of the transaction, the amounts due to NSGold by each of NSX Silver for reorganization costs and CMOB for Dios Padre exploration costs were repaid, and the net amount disbursed by NSGold was \$3,474,063. Contemporaneously the Dios Padre Option Agreement, complete with all its rights and obligations, was assigned to NSX Silver.

NSGold then completed the distribution of the common shares of NSX Silver to the NSGold shareholders whereby the shareholders received one share of NSX Silver for each share of NSGold held on the record date of March 16, 2012. A total of 43,553,767 shares of NSX Silver were distributed with the distribution, effected by way of a distribution of paid up capital.

The common shares of NSX Silver commenced trading on the TSX Venture Exchange on March 14, 2012 as a Tier 2 Mining Issuer under the trading symbol "NSY".

During 2013 the Company terminated the Dios Padre option agreement and the Company's focus was redirected to the Oso Blanco property.

On January 23, 2015, the Company completed a one-for-ten share consolidation of its common shares. As a result the Company has 4,592,957 issued and outstanding common shares.

On November 17, 2015 the Company announced it had entered into a binding letter of agreement with an arm's-length purchaser whereby it agreed to sell the shares of CMOB to the purchaser. The purchaser agreed to assume all of CMOB's liabilities and to grant to NSX Silver a 2% net smelter return royalty on any future mineral production from the eleven mining concessions that CMOB held at the time of the sale of the shares. The Company received shareholder approval for the CMOB disposition at a special meeting of shareholders held on December 16, 2015. Shareholder approval was required pursuant to Section 189 of the *Canada Business Corporations Act* as the sale of

CMOB constituted a sale or exchange of all or substantially all the assets of NSX Silver. The transaction closed on December 30, 2015.

Subsequent to the closing of the CMOB Sale, the Company has no continuing business operations and the Board of Directors of the Company is exploring potential strategic alternatives. There can be no assurance that such exploration of strategic alternatives will result in a transaction being pursued, entered into or consummated.

On February 8, 2016, the Company's listing of its common shares was transferred to the NEX Board of the TSX Venture Exchange (the "NEX"). The NEX trading platform is a separate board of the TSXV.

On August 16, 2016, the Company completed a non-brokered private placement raising gross proceeds of \$300,000 through the issuance of 4,999,992 units at a price of \$0.06 per unit. Each unit is comprised of one common share of the Company and one common share purchase warrant. Each warrant entitles the holder to acquire one common share of the Company for \$0.12 for a period of 12 months from the closing date.

Resource Properties – Royalty Interest

NSX Silver holds a 2% net smelter return royalty on any future mineral production from the eleven mining concessions, including the Oso Blanco property, that CMOB held at the time of the sale of the shares. All of the mining concessions are located in Sonora State, Mexico and are considered to be early stage exploration properties.

Selected Financial Information

NSX Silver's net loss for the six month period ended June 30, 2016 was \$24,468 or \$0.005 per share. NSX Silver's net loss for the year ended December 31, 2015 was \$338,876 or \$0.07 per share compared to a net loss for the year ended December 31, 2014 of \$191,240 or \$0.04 per share. In 2015 the Company recorded a loss on disposition of CMOB of \$295,968 or \$0.06 per share. In 2014 the Company recorded a provision for non-recoverable Mexican VAT of \$50,000 or \$0.01 per share representing approximately 50% of the outstanding recoverable Mexican VAT at the end of 2014.

On January 23, 2015, the Company completed a one-for-ten share consolidation. All references to net loss per share have been adjusted retrospectively to reflect the one-for-ten share consolidation.

The following table contains selected financial information as at June 30, 2016, December 31, 2015 and December 31, 2014.

	As at June 30, 2016 \$	As at December 31, 2015 \$	As at December 31, 2014 \$

Provision for recoverable VAT	-	-	-	-	-	-	50,000	-
Loss on disposition of Mexican subsidiary	-	-	295,968	-	-	-	-	-
Net loss (income) for the period	20,292	4,176	324,952	(14,851)	14,506	14,267	60,419	14,436
Basic and diluted net loss per share after 1 for 10 share consolidation	\$0.004	\$0.001	\$0.07	(\$0.003)	\$0.003	\$0.003	\$0.01	\$0.003

Results of Operations for the Three and Six Months Ended June 30, 2016

NSX Silver's net loss for the three months ended June 30, 2016 was \$20,292 or \$0.004 per share as compared to a net loss of \$14,506 or \$0.003 per share for the three months ended June 30, 2015.

NSX Silver's net loss for the six months ended June 30, 2016 was \$24,468 or \$0.005 per share as compared to a net loss of \$28,773 or \$0.006 per share for the six months ended June 30, 2015.

In light of the continued challenging financing conditions relating to TSX Venture resource issuers, the Company implemented significant reductions in corporate expenses in 2014 and 2015 with the Company incurring a significantly reduced level of general and administrative expenses during these years and also during H1 2016. The Company discontinued incurring wages and benefits, consulting fees and property investigation expenses in 2015 and Q1 2016.

The Company has no continuing business operations and the Board of Directors of the Company continue to explore potential strategic alternatives. There can be no assurance that such exploration of strategic alternatives will result in a transaction being pursued, entered into or consummated.

Liquidity and Capital Resources

The following table contains selected financial information as at June 30, 2016, December 31, 2015 and December 31, 2014:

	As at June 30, 2016	As at December 31, 2015	As at December 31, 2014
	\$	\$	\$
Total current assets	17,324	6,355	62,358
Resource properties	-	-	304,077
Total assets	17,324	6,355	384,856
Total liabilities	130,773	95,336	134,961
Shareholder equity	(113,449)	(88,981)	249,895

As at June 30, 2016, the Company had a net working capital deficiency of \$113,449 compared to a net working capital deficiency of \$88,981 at December 31, 2015.

The Company finances its operations through the issuance of equity securities. The Company is dependent on raising additional funding through the issuance of equity securities in order to meet its ongoing general and administrative requirements.

During the six month period ended June 30, 2016, the Company received advances from directors of the Company aggregating \$18,000 (June 30, 2015 - \$13,000). These advances are non-interest bearing and are payable upon demand.

Off-Balance Sheet Arrangements

The Company has no off-balance sheet arrangements.

Related Party Transactions

During the six month period ended June 30, 2016, the Company incurred legal fees aggregating \$3,727 (year ended December 31, 2015 - \$6,068) from a law firm of which one of the officers is a partner.

Outstanding Share Data

On January 23, 2015 the Company completed a one-for-ten share consolidation which was approved at the Company's annual general meeting. All references to capital stock, warrants and options have been adjusted retrospectively to reflect the one-for-ten share consolidation.

The Company has 4,592,957 common shares issued and outstanding as at June 30, 2016. Subsequent to quarter-end the Company issued completed a non-brokered private placement raising gross proceeds of \$300,000 through the issuance of 4,999,992 units at a price of \$0.06 per unit. Each unit is comprised of one common share of the Company and one common share purchase warrant. Each warrant entitles the holder to acquire one common share of the Company for \$0.12 for a period of 12 months from the closing date.

During the year ended December 31, 2015, the Company, with agreement from the optionees, cancelled all of the outstanding options. As a result, there are no outstanding options at June 30, 2016 and August 29, 2016.

The Company has 9,592,949 common shares issued and outstanding at August 29, 2016. The fully diluted number of common shares at August 29, 2016 is 14,592,941.

New Standards and Interpretations Not Yet Adopted

The following new standards and amendments to the standard are not yet effective and have not been applied in preparing these consolidated financial statements. Accordingly, the Company expects to adopt these standards as set forth below.

IFRS 9, Financial Instruments

IFRS 9, "Financial instruments" introduces new requirements for the classification and measurement of financial assets. IFRS 9 requires all recognized financial assets that are within the scope of IAS 39 Financial Instruments: Recognition and Measurement to be measured at amortized cost or fair value in subsequent accounting periods following initial recognition. Specifically, financial assets that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal outstanding are generally measured at amortized cost at the end of subsequent accounting periods. All other financial assets including equity investments are measured at their fair values at the end of subsequent accounting periods.

Requirements for classification and measurement of financial liabilities were added in October 2010 and they largely carried forward existing requirements in IAS 39, Financial Instruments – Recognition and Measurement, except that fair value changes due to credit risk for liabilities designated at fair value through profit and loss would generally be recorded in other comprehensive income.

IFRS 9 was amended in November 2013 to: (i) include guidance on hedge accounting; (ii) allow entities to early adopt the requirement to recognize changes in fair value attributable to changes in an entity’s own credit risk, from financial liabilities designated under the fair value option, in other comprehensive loss, without having to adopt the remainder of IFRS 9; and (iii) remove the previous mandatory effective date for adoption of January 1, 2015, although the standard is available for early adoption.

The final version of IFRS 9 was issued in July 2014 and includes: (i) a third measurement category for financial assets – fair value through other comprehensive income; (ii) a single, forward-looking expected loss impairment model; and (iii) a mandatory effective date for IFRS 9 of annual periods beginning on or after January 1, 2018, with early adoption permitted. The Company is currently evaluating the impact of the new standard on its financial statements.

IFRS 16, Leases

IFRS 16, “Leases” (“IFRS 16”) a new standard on lease accounting, was issued on January 13, 2016 and replaces the current guidance in IAS 17. The new standard results in substantially all lessee leases being recorded on the statement of financial position. IFRS 16 is effective for annual periods beginning on or after January 1, 2019, with early adoption permitted. The Company is currently evaluating the impact of this new standard on the Company’s financial statement measurements and disclosures. The Company does not anticipate early adoption of this standard.

IFRS 15, Revenue from Contracts and Customers

The IASB issued IFRS 15 “Revenue from Contracts and Customers” (“IFRS 15”) effective for annual periods beginning on or after January 1, 2018, although the standard is available for early adoption. IFRS 15 replaces IAS 18, “Revenue” and IAS 11, “Construction Contracts”, and some revenue related interpretations. The underlying principle is that an entity will recognize revenue to depict the transfer of goods and services to customers at an amount the entity expects to be entitled to in exchange for those goods and services. The Company is currently evaluating the impact of the new standard in its consolidated financial statements.

Risks and Uncertainties

The following are certain factors relating to the business of the Company. These risks and uncertainties are not the only ones facing the Company. Additional risks and uncertainties not currently known to the Company, or that the Company currently deems immaterial, may also impair the operations of the Company. If any such risks actually occur, the financial condition, liquidity and results of operations of the Company could be materially adversely affected and the ability of the Company to implement its growth plans could be adversely affected.

The following is a description of certain risks and uncertainties that may affect the business of the Company.

i. Limited Operating History

The Company is a relatively new company with limited operating history and no history of business or mining operations, revenue generation or production history. The Company was incorporated August 9, 2011 and has yet to generate a profit from its activities. The Company will be subject to all of the business risks and uncertainties associated with any new business enterprise, including the risk that it will not achieve its growth objective. The Company anticipates that it may take several years to achieve positive cash flow from operations.

ii. Exploration, Development and Operating Risks

The exploration for and development of minerals involves significant risks, which even a combination of careful evaluation, experience and knowledge may not eliminate. Few properties which are explored are ultimately developed into producing mines. There can be no guarantee that the estimates of quantities and qualities of minerals disclosed will be economically recoverable. With all mining operations there is uncertainty and, therefore, risk associated with operating parameters and costs resulting from the scaling up of extraction methods tested in pilot conditions. Mineral exploration is speculative in nature and there can be no assurance that any minerals discovered will result in an increase in the Company's resource base.

The Company's operations are subject to all of the hazards and risks normally encountered in the exploration, development and production of minerals. These include unusual and unexpected geological formations, rock falls, seismic activity, flooding and other conditions involved in the extraction of material, any of which could result in damage to, or destruction of, mines and other producing facilities, damage to life or property, environmental damage and possible legal liability. Although precautions to minimize risk will be taken, operations are subject to hazards that may result in environmental pollution and consequent liability that could have a material adverse impact on the business, operations and financial performance of the Company.

iii. Substantial Capital Requirements and Liquidity

Substantial additional funds for the establishment of the Company's current and planned mining operations will be required. No assurances can be given that the Company will be able to raise the additional funding that may be required for such activities, should such funding not be fully generated from operations. Mineral prices, environmental rehabilitation or restitution, revenues, taxes, transportation costs, capital expenditures, operating expenses and geological results are all factors which will have an impact on the amount of additional capital that may be required. To meet such funding requirements, the Company may be required to undertake additional equity financing, which would be dilutive to shareholders. Debt financing, if available, may also involve restrictions on financing and operating activities. There is no assurance that additional financing will be available on terms acceptable to the Company or at all. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations or anticipated expansion.

iv. Fluctuating Mineral Prices

The economics of mineral exploration is affected by many factors beyond the Company's control, including commodity prices, the cost of operations, variations in the grade of minerals explored and fluctuations in the market price of minerals. Depending on the price of minerals, it may be determined that it is impractical to continue the mineral exploration operation.

Mineral prices are prone to fluctuations and the marketability of minerals is affected by government regulation relating to price, royalties, allowable production and the importing and exporting of minerals, the effect of which cannot be accurately predicted. There is no assurance that a profitable market will exist for the sale of any minerals found on the Company's properties.

v. Regulatory Requirements

The current or future operations of the Company require permits from various governmental authorities, and such operations are and will be governed by laws and regulations governing exploration, development, production, taxes, labour standards, occupational health, waste disposal, toxic substances, land use, environmental protection, site safety and other matters. Companies engaged in the exploration and development of mineral properties generally experience increased costs and delays in development and other schedules as a result of the need to comply with applicable laws, regulations and permits. There can be no assurance that all permits which the Company may require for the facilities and conduct of exploration and development operations will be obtainable on reasonable terms or that such laws and regulation would not have an adverse effect on any exploration and development project which the Company might undertake.

Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment or remedial actions. Parties engaged in exploration and development operations may be required to compensate those suffering loss or damage by reason of the exploration and development activities and may have civil or criminal fines or penalties imposed upon them for violation of applicable laws or regulations. Amendments to current laws, regulation and permits governing operations and activities of mineral companies, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in capital expenditures or exploration and development costs or require abandonment or delays in the development of new properties.

vi. Financing Risks and Dilution to Shareholders

The Company has limited financial resources, no operations and no revenues. If the Company's exploration program on its exploration properties is successful, additional funds will be required for the purposes of further exploration and development. There can be no assurance that the Company will be able to obtain adequate financing in the future or that such financing will be available on favourable terms or at all. It is likely such additional capital will be raised through the issuance of additional equity, which will result in dilution to the Company's shareholders.

vii. Title to Properties

Acquisition of title to mineral properties is a very detailed and time-consuming process. Title to, and the area of, mineral properties may be disputed. The Company cannot give an assurance that title to its exploration properties will not be challenged or impugned. Mineral properties sometimes contain claims or transfer histories that examiners cannot verify. A successful claim that NSX Silver does not have title to its exploration properties could cause the Company to lose any rights to explore, develop and mine any minerals on that property, without compensation for its prior expenditures relating to such property.

viii. Requirement for Permits and Licenses

A substantial number of permits and licenses may be required should the Company proceed beyond exploration; such licenses and permits may be difficult to obtain and may be subject to changes in regulations and in various operational circumstances. It is uncertain whether the Company will be able to obtain all such licenses and permits.

ix. Competition

There is competition within the mining industry for the discovery and acquisition of properties considered to have commercial potential. The Company competes with other mining companies, many of which have greater financial, technical and other resources than the Company, for, among other things, the acquisition of minerals claims, leases and other mineral interests as well as for the recruitment and retention of qualified employees and other personnel.

x. Reliance on Management and Dependence on Key Personnel

The success of the Company will be largely dependent upon on the performance of its directors and officers and the ability to attract and retain key personnel. The loss of the services of these persons may have a material adverse effect on the Company's business and prospects. The Company will compete with numerous other companies for the recruitment and retention of qualified employees and contractors. There is no assurance that the Company can maintain the service of its directors and officers or other qualified personnel required to operate its business. Failure to do so could have a material adverse effect on the Company and its prospects.

xi. No Mineral Reserves

Mineral reserves are, in the large part, estimates and no assurance can be given that the anticipated tonnages and grades will be achieved or that the indicated level of recovery will be realized. Reserve estimates for properties that have not yet commenced production may require revision based on actual production experience. Market price fluctuations of metals, as well as increased production costs or reduced recovery rates, may render mineral reserves

containing relatively lower grades of mineralization uneconomic and may ultimately result in a restatement of reserves. Moreover, short-term operating factors relating to the mineral reserves, such as the need for orderly development of the ore bodies and the processing of new or different mineral grades, may cause a mining operation to be unprofitable in any particular accounting period.

xii. Environmental Risks

The Company's exploration and appraisal programs will, in general, be subject to approval by regulatory bodies. Additionally, all phases of the mining business present environmental risks and hazards and are subject to environmental regulation pursuant to a variety of international conventions and federal, provincial and municipal laws and regulations. Environmental legislation provides for, among other things, restrictions and prohibitions on spills, releases or emissions of various substances produced in association with mining operations. The legislation also requires that wells and facility sites be operated, maintained, abandoned and reclaimed to the satisfaction of applicable regulatory authorities. Compliance with such legislation can require significant expenditures and a breach may result in the imposition of fines and penalties, some of which may be material. Environmental legislation is evolving in a manner expected to result in stricter standards and enforcement, larger fines and liability and potentially increased capital expenditures and operating costs.

xiii. Governmental Regulations and Processing Licenses and Permits

The activities of the Company are subject to Mexican approvals, various laws governing prospecting, development, land resumptions, production taxes, labour standards and occupational health, mine safety, toxic substances and other matters. Although the Company believes that its activities are currently carried out in accordance with all applicable rules and regulations, no assurance can be given that new rules and regulations will not be enacted or that existing rules and regulations will not be applied in a manner which could limit or curtail production or development. Amendments to current laws and regulations governing operations and activities of exploration and mining, or more stringent implementation thereof, could have a material adverse impact on the business, operations and financial performance of the Company. Further, the mining licenses and permits issued in respect of its projects may be subject to conditions which, if not satisfied, may lead to the revocation of such licenses. In the event of revocation, the value of the Company's investments in such projects may decline.

xiv. Local Resident Concerns

Apart from ordinary environmental issues, work on, or the development and mining of the Oso Blanco property could be subject to resistance from local residents that could either prevent or delay exploration and development of the property.

xv. Management Inexperience in Developing Mines

The management of the Company has some experience in exploring for minerals, but may lack all or some of the necessary technical training and experience to successfully develop and operate a mine. Without adequate training or experience in these areas, management may not be fully aware of many of the specific requirements related to working within the mining industry and their decisions and choices may not take into account all available and necessary engineering or managerial approaches that experienced mine operating companies commonly use to successfully develop a mine. Consequently, the Company's operations, earnings and ultimate financial success could be materially adversely effected.

xvi. Conflicts of Interest

Certain of the directors and officers of the Company are engaged in, and will continue to engage in, other business activities on their own behalf and on behalf of other companies (including mineral resource companies) and, as a result of these and other activities, such directors and officers of the Company may become subject to conflicts of interest. The Canada Business Corporations Act (CBCA) provides that in the event that a director has a material interest in a contract or proposed contract or agreement that is material to the Company, the director must disclose his interest in such contract or agreement and refrain from voting on any matter in respect of such contract or

agreement, subject to and in accordance with the CBCA. To the extent that conflicts of interest arise, such conflicts will be resolved in accordance with the provisions of the CBCA.

xvii. Uninsurable Risks

Exploration, development and production operations on mineral properties involve numerous risks, including unexpected or unusual geological operating conditions, rock bursts, cave-ins, fires, floods, earthquakes and other environmental occurrences. It is not always possible to obtain insurance against all such risks and the Company may decide not to insure against certain risks as a result of high premiums or other reasons. Should such liabilities arise, they could have an adverse impact on the Company's results of operations and financial condition and could cause a decline in the value of the Company's shares. The Company does not intend to maintain insurance against environmental risks.

xviii. Litigation

The Company and/or its directors may be subject to a variety of civil or other legal proceedings, with or without merit.

xix. Dividends

To date, NSX Silver has not paid any dividends on its outstanding shares. Any decision to pay dividends on the shares of the Company will be made by its board of directors on the basis of the Company's earnings, financial requirements and other conditions.

Additional information regarding the Company is available on SEDAR at www.sedar.com.
